

## EVVO V0333

# EVVO Decorative Extractor Hood User Manual

Model: V0333

## 1. INTRODUCTION

---

Thank you for choosing the EVVO Decorative Extractor Hood. This appliance combines high performance with an elegant design, bringing modernity and efficiency to your kitchen. Designed to effectively eliminate smoke, odors, and vapors, it ensures a clean and fresh environment while cooking. This manual provides essential information for the safe and efficient operation, installation, and maintenance of your new extractor hood.

## 2. IMPORTANT SAFETY INFORMATION

---

Please read all instructions carefully before installation and use. Keep this manual for future reference.

- **Electrical Safety:** Ensure the power supply matches the voltage specified on the rating plate. Always disconnect the appliance from the power supply before cleaning or maintenance.
- **Installation:** Installation must be carried out by a qualified person in accordance with local regulations. Ensure adequate ventilation in the room when the hood is used simultaneously with gas or other fuel-burning appliances.
- **Fire Hazard:** Do not flambé under the extractor hood. Do not leave frying pans unattended during use, as overheated oil can ignite. Clean grease filters regularly to prevent grease accumulation, which can be a fire hazard.
- **Children and Vulnerable Persons:** This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- **Cleaning:** Use only neutral detergents. Do not use abrasive products or corrosive materials.
- **Light Bulbs:** For information on recycling and cleaning broken light bulbs, refer to the relevant sections provided by your local authorities.

## 3. SETUP AND INSTALLATION

---

The EVVO Extractor Hood is designed for wall-mounted installation. It can operate in ducted (vented) mode or recirculating mode (with activated carbon filters).

### 3.1 Unpacking

Carefully unpack the hood and check for any damage. Keep all packaging materials until you are satisfied with the product. The package includes the extractor hood, aluminum filters, and activated carbon filters.

### 3.2 Installation Requirements

- Ensure the wall is strong enough to support the hood's weight (approx. 12 kg).
- Maintain the minimum distance between the hob and the lower part of the hood as specified in local regulations (typically 65 cm for electric hobs and 75 cm for gas hobs).
- For ducted mode, ensure a suitable ducting system is available to vent air outside.
- For recirculating mode, ensure activated carbon filters are correctly installed.

### 3.3 Mounting the Hood

Detailed mounting instructions are provided in the separate installation guide. Generally, this involves:

1. Marking drilling points on the wall according to the template.
2. Drilling holes and inserting wall plugs.
3. Mounting the hood bracket.
4. Attaching the hood to the bracket.
5. Connecting the ducting or installing carbon filters.
6. Connecting to the electrical supply.

## 4. OPERATING INSTRUCTIONS

---

The EVVO Extractor Hood features a user-friendly touch control panel with a display, allowing for easy operation.

### 4.1 Control Panel Overview

The touch panel typically includes buttons for power, speed selection, lighting, and timer functions.

Figure 3: Sleek black glass design of the EVVO Extractor Hood.

### 4.2 Functions

- **Power On/Off:** Touch the power symbol to turn the hood on or off.
- **Speed Adjustment:** Select from three adjustable speeds to match your cooking needs.
  - Low (252 m<sup>3</sup>/h): For light cooking or maintaining air quality.

- Medium (560 m<sup>3</sup>/h): For general cooking.
- High (818 m<sup>3</sup>/h): For heavy cooking or strong odors.
- **Boost Mode:** Activate boost mode for maximum suction power (818 m<sup>3</sup>/h) when extra ventilation is required. This mode typically runs for a set period before returning to the previous speed setting.
- **Lighting:** Touch the light symbol to turn the LED lights on or off. The two 1.5W LED lights efficiently illuminate your cooking area.
- **Automatic Shut-off Timer:** Set a timer for the hood to automatically turn off after a specified duration, enhancing energy efficiency and convenience.

## 5. MAINTENANCE AND CLEANING

---

Regular maintenance ensures optimal performance and extends the lifespan of your extractor hood.

### 5.1 Cleaning the Exterior

- Wipe the exterior surfaces, especially the black crystal finish, with a soft cloth dampened with mild detergent.
- Do not use abrasive cleaners, scouring pads, or corrosive substances, as these can damage the surface.
- Dry thoroughly with a clean, soft cloth.

### 5.2 Cleaning/Replacing Filters

The hood is equipped with 5-layer aluminum grease filters and activated carbon filters.

#### Aluminum Grease Filters:

- These filters capture grease particles and should be cleaned regularly (approximately every 2-4 weeks depending on usage).
- To remove, locate the release latches and pull down.
- Wash the filters by hand in hot soapy water or in a dishwasher on a low-temperature cycle.
- Ensure filters are completely dry before re-installing.

#### Activated Carbon Filters (for recirculating mode):

- These filters neutralize odors and are not washable. They need to be replaced periodically (typically every 3-6 months, depending on usage).
- Refer to your specific model's instructions for removal and replacement of carbon filters.

## 6. TROUBLESHOOTING

---

Before contacting customer service, please check the following common issues and solutions:

Problem	Possible Cause	Solution
Hood does not turn on.	No power supply. Power cord not properly connected.	Check if the hood is plugged in and the circuit breaker is on. Ensure the power cord is securely connected.

Problem	Possible Cause	Solution
Low suction power.	Grease filters are dirty. Activated carbon filters are saturated (recirculating mode). Ducting is blocked or too long/narrow.	Clean the aluminum grease filters. Replace the activated carbon filters. Check ducting for obstructions or improper installation.
Excessive noise.	Loose components. Improper installation. Ducting issues.	Check that all screws and components are tightened. Ensure the hood is securely mounted. Verify ducting is correctly installed and free of sharp bends.
Lights not working.	LED lights faulty. Electrical connection issue.	Contact customer service for LED light replacement. Check electrical connections.

## 7. TECHNICAL SPECIFICATIONS

Model: EVVO CE42 (V0333)

Feature	Specification
Brand	EVVO
Model Identifier	CE42 (V0333)
Product Dimensions (W x D x H)	60 cm (width) x 32 cm (depth) x 81.4 cm (height)
Weight	12 kg
Motor Power	220 W
Max. Airflow Capacity	800 m <sup>3</sup> /h (Boost: 818 m <sup>3</sup> /h)
Noise Level (Min/Max/Boost)	44 dB / 64 dB / 71 dB
Energy Efficiency Class	A++
Annual Energy Consumption	40.1 kWh/year
Lighting	2 x 1.5 W LED (Type: LED)
Filter Type	5-layer Aluminum Grease Filter, Activated Carbon Filter
Control Method	Touch Control with Display, Gesture Control
Ventilation Type	Ducted / Recirculating
Spare Parts Availability (EU)	10 Years
