Canon 10D

Canon EOS-10D Digital DSLR Camera Instruction Manual

INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Canon EOS-10D 6.3MP Digital DSLR Camera. The EOS-10D is a robust digital single-lens reflex camera featuring a 6.3-megapixel CMOS image sensor, designed for high-quality photography with Canon EF lenses. Please read this manual thoroughly before using your camera and keep it for future reference.

SETUP

1. Battery Installation

1. Ensure the camera is powered off.
2. Open the battery compartment cover, typically located on the bottom of the camera.
3. Insert the BP-511 Lithium-ion battery, ensuring the correct orientation as indicated inside the compartment.
4. Close the battery compartment cover securely until it clicks into place.

2. Memory Card Insertion

1. Ensure the camera is powered off.
2. Open the CompactFlash card slot cover, usually on the side of the camera.
3. Insert a CompactFlash Type I or II card into the slot with the correct orientation. Push until it clicks into place.
4. Close the card slot cover securely.

3. Attaching a Lens

1. Remove the body cap from the camera and the rear cap from the lens.
2. Align the red or white index mark on the lens with the corresponding mark on the camera's EF lens mount.
3. Rotate the lens clockwise until it locks into place with a click.

OPERATING INSTRUCTIONS

1. Powering On/Off

Locate the power switch, typically near the mode dial or shutter button. Slide it to the 'ON' position to power on the camera. Slide it to 'OFF' when not in use to conserve battery life.

Figure 2: Top-back view of the Canon EOS-10D, highlighting the top LCD panel and various control buttons.

2. Basic Photography

1. **Select a Shooting Mode:** Rotate the mode dial (usually on the top left) to select your desired shooting mode (e.g., Program AE, Shutter-priority AE, Aperture-priority AE, Manual, or various Scene modes).

2. **Focusing:** Look through the viewfinder and half-press the shutter button to activate the 7-area autofocus system. The camera will focus on your subject.

3. **Taking a Picture:** Once focused, fully press the shutter button to capture the image. The camera can capture images at 3 frames per second (fps) for up to 9 shots in a burst.

4. **Image Quality:** Images can be saved simultaneously in both RAW and JPEG formats. The camera uses a 6.3-megapixel CMOS sensor, producing images up to 3072 x 2048 pixels, and supports Adobe RGB color space.

3. Reviewing Images

Press the 'PLAY' button (often labeled with a triangle icon) to view captured images on the LCD screen. Use the directional buttons or main dial to navigate through your photos.

4. Connecting to a Computer

The Canon EOS-10D connects to PCs and Macs via a USB 1.1 interface. Use the provided USB cable to transfer images to your computer. Ensure the camera is powered on and in the correct connection mode (if applicable) before connecting.

Maintenance

1. Cleaning the Camera

- **Camera Body:** Use a soft, dry cloth to wipe the camera body. For stubborn dirt, slightly dampen the cloth with water. Avoid using organic solvents.
- **Lens Mount:** Keep the lens mount free of dust and debris. Use a blower brush to remove loose particles. Avoid touching the mirror or sensor directly.
- **LCD Screen:** Gently wipe the LCD screen with a microfiber cloth designed for optics.

2. Battery Care

- Charge the BP-511 battery fully before use.
- Store batteries in a cool, dry place when not in use.
- Do not expose batteries to extreme temperatures or direct sunlight.

3. Storage

When storing the camera for extended periods, remove the battery and memory card. Store the camera in a dry, dust-free environment, ideally with a desiccant to prevent mold and mildew.

TROUBLESHOOTING

- **Camera Not Powering On:** Check if the battery is correctly inserted and charged. Ensure the power switch is in the 'ON' position.

- **No Image on LCD:** Ensure the camera is in playback mode. If shooting, check viewfinder for image.

- **Memory Card Error:** Reinsert the CompactFlash card. If the error persists, try a different card. Ensure the card is not write-protected.

- **Poor Image Quality:** Check lens cleanliness. Ensure appropriate shooting mode and settings (ISO, aperture, shutter speed) are selected for the lighting conditions.

- **Lens Not Focusing:** Ensure the lens is securely attached and the autofocus switch on the lens (if present) is set to 'AF'. Check lighting conditions; very low light can hinder autofocus.

SPECIFICATIONS

Feature	Specification
Model Name	Canon EOS-10D
Image Sensor	6.3-megapixel CMOS
Max. Image Resolution	3072 x 2048 pixels
Lens Mount	Canon EF
File Formats	JPEG, RAW
Burst Rate	3 frames per second (up to 9 shots)
Autofocus System	7-area AF sensor
Color Space	Adobe RGB
Memory Card Type	CompactFlash Type I and II
Battery	Rechargeable Lithium-ion (BP-511)
Connectivity	USB 1.1
Dimensions (W x H x D)	5.91 x 2.95 x 4.21 inches
Weight	1.93 pounds
Aspect Ratio	3:2
Image Stabilization	Digital
Metering Description	Center Weighted
Expanded ISO Minimum	100

Warranty and Support

This Canon EOS-10D camera comes with a FULL 14 DAY SATISFACTION GUARANTEE and a FULL 90 DAY PARTS AND LABOR WARRANTY. For any technical support or warranty claims, please contact the seller or refer to Canon's official support channels.
