modelones 6 Colors Hema Free Gel Nail Polish Set User Manual

Model: 6 Colors Hema Free Gel Nail Polish Set

1. PRODUCT OVERVIEW

The modelones 6 Colors Hema Free Gel Nail Polish Set provides a complete solution for at-home gel manicures. This set includes six vibrant, Hema-free gel nail polishes, along with a Hema-free base coat and top coat, designed for sensitive skin and long-lasting wear. The formula is developed to minimize irritation while delivering a professional finish.

2. SAFETY INFORMATION

This product features a Hema-free and TPO-free formula, making it suitable for individuals with sensitive skin or allergies to traditional gel polish ingredients. While formulated to be gentle, it is important to follow these safety guidelines:

- **External Use Only:** This product is intended for external use on nails only. Avoid contact with skin beyond the nail plate.
- **Skin Test Recommended:** Before full application, perform a patch test on a small area of skin (e.g., behind the ear or on the inner arm) and wait 24-48 hours to check for any allergic reactions or discomfort.
- **Discontinue Use:** If any discomfort, irritation, redness, swelling, or allergic reaction occurs, stop using the product immediately and consult a medical professional if symptoms persist.
- **Storage:** Store in a cool, dry place away from direct sunlight and heat. Keep out of reach of children.

Let Your Nails Be Your Best

Get Ready to Shine

3. APPLICATION INSTRUCTIONS

Achieve a professional gel manicure by following these steps. A UV/LED nail lamp is required for curing each layer.

1. **Prep Nails:** Clean and gently push back cuticles. Lightly buff the nail surface to remove shine and ensure better adhesion.
2. **Apply Base Coat:** Apply a thin, even layer of the Hema-free base coat. Cure under a UV/LED nail lamp for 60-90 seconds (UV lamp) or 30-60 seconds (LED lamp).
3. **Apply Color Gel Polish:** Apply a thin, even layer of your chosen color gel polish. Cure under a UV/LED nail lamp for 60-90 seconds (UV lamp) or 30-60 seconds (LED lamp). For deeper color, apply a second thin layer and cure again.
4. **Apply Top Coat:** Apply a thin, even layer of the Hema-free top coat. Cure under a UV/LED nail lamp for 90-120 seconds (UV lamp) or 60-90 seconds (LED lamp) until completely dry and non-tacky.
5. **Cleanse (Optional):** If there is a sticky residue after curing the top coat, wipe it off gently with a lint-free wipe soaked in nail cleanser or 70% isopropyl alcohol.

4. MAINTENANCE AND LONGEVITY

To ensure your gel manicure lasts for 28+ days and maintains its shine, consider the following:

- **Proper Curing:** Ensure each layer is fully cured under the UV/LED lamp according to the recommended times. Under-curing can lead to chipping and lifting.
- **Thin Layers:** Apply gel polish in thin, even layers. Thick layers may not cure properly and can peel or wrinkle.
- **Cap the Free Edge:** When applying each coat (base, color, top), gently brush the product along the free edge of the nail to seal it. This helps prevent chipping.
- **Avoid Harsh Chemicals:** Wear gloves when performing household chores or working with harsh chemicals to protect your manicure.
- **Moisturize:** Keep your cuticles and hands moisturized to maintain nail health and flexibility.

Superior “14 Toxin-Free” Formula

0%
HEMA

0%
TPHP

0%
Camphor

0%
Toluene

0%

5. TROUBLESHOOTING

If you encounter issues with your gel manicure, refer to these common solutions:

- **Chipping or Peeling:**

- Ensure nails are properly prepped (clean, dry, lightly buffed).
- Apply thin layers and ensure each layer is fully cured.
- Remember to cap the free edge of the nail with each coat.

- **Lifting:**

- Avoid getting gel polish on the cuticles or skin; this can cause lifting. Clean up any overflow before curing.
- Ensure proper nail preparation, including pushing back cuticles and removing any non-living tissue.

- **Dull Finish:**

- Ensure the top coat is fully cured.
- If using a wipe-off top coat, use a fresh, lint-free wipe with nail cleanser or isopropyl alcohol to remove the sticky inhibition layer.

- **Allergic Reaction:**

- If you experience itching, redness, or swelling, discontinue use immediately.
- Consult a medical professional if symptoms persist.
