## TROUBLESHOOTING

If you encounter any issues with your sofa, please refer to the following common solutions:

| Problem   | Possible Cause / Solution   |
|---|---|
| Sofa sections separate or are difficult to connect. | Ensure the component connectors are correctly aligned and fully engaged. Lift and adjust sections as needed to secure the connection. |

| Problem  | Possible Cause / Solution   |
|--|---|
| Pull-out bed mechanism is stiff or gets stuck. | Check for any obstructions in the track. Ensure the mechanism is clean and free of debris. Apply a silicone-based lubricant if necessary. |
| Cushions appear flat or lose shape.            | Fluff and rotate cushions regularly. High-density foam cushions may require some time to fully expand after unpacking.                    |
| Fabric pilling or wear.                        | Pilling can occur with normal use. Use a fabric shaver to gently remove pills. Regular vacuuming can also help.                           |

If the issue persists, please contact customer support for further assistance.
