MAINTENANCE

General Care

- **Regular Cleaning:** Vacuum the sofa regularly using a soft brush attachment to remove dust and loose debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Avoid rubbing, as this can spread the stain. For stubborn stains, use a mild fabric cleaner suitable for upholstery, testing on an inconspicuous area first.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position your sofa away from direct sunlight or use curtains/blinds.
- **Fluff Cushions:** Regularly fluff and rotate seat and back cushions to maintain their shape and even out wear.

Fabric Specific Care

The sofa is made with a soft and breathable linen-like fabric. This material is generally easy to clean. Always follow the specific cleaning instructions provided on the product tag, if available.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Sofa units slide apart easily.	Connectors not fully engaged or sofa not against a wall.	Ensure all modular connectors are securely fastened. If possible, position the sofa against a wall to provide additional stability. Consider using non-slip pads under the legs.
Cushions appear to be separating or shifting.	Normal wear and tear, or cushions not properly aligned.	Regularly fluff and realign cushions. Ensure they are seated correctly within their designated areas.
Sofa feels less firm over time.	Natural compression of foam fill material.	Regularly fluff and rotate cushions. This is a normal characteristic of foam-filled furniture over extended use.
