### 3.1 Unpacking and Preparation

- Clear a spacious area for assembly.
- Unpack all components and lay them out on a soft, clean surface to prevent scratches.
- Identify all parts and hardware using the provided parts list in the assembly kit.

### 3.2 Frame Assembly

1. **Assemble Headboard/Footboard Sections:** Connect the vertical posts to the arched headboard/footboard pieces using the specified bolts and washers. Ensure all connections are finger-tight at this stage.
2. **Attach Side Rails:** Connect the long side rails to the assembled headboard/footboard sections. Again, keep bolts finger-tight to allow for adjustments.
3. **Install Support Bars:** Secure the horizontal support bars to the lower sections of the bed frame. These provide additional stability.
4. **Tighten All Connections:** Once the main frame is assembled, systematically tighten all bolts using the provided Allen wrench. Ensure all connections are secure but do not overtighten.

### 3.3 Ladder and Slat Installation

5. **Assemble Ladder:** Attach the ladder steps to the ladder side rails. The ladder can be installed on either the left or right side of the bed, depending on your room configuration. Secure it firmly to the bed frame.
