- Verify that the power adapter is securely plugged into both the clock and a working wall outlet.
- Check if the wall outlet is receiving power.

7.2 Incorrect Time/Date

- Access the 'Date & Time' settings via the menu to manually adjust if necessary.
- Ensure the correct time zone is selected.
- If the issue persists after a power outage, check the CR2032 backup batteries.

7.3 Remote Control Not Responding

- Ensure there are no obstructions between the remote and the clock.
- Replace the remote control batteries if needed.
- Alternatively, use the side-mounted control buttons on the clock.
