TORRAS FlexLine 40W Charger Instruction Manual (Model CQ4)

Model: CQ4

INTRODUCTION

The TORRAS FlexLine 40W Charger is designed for efficient and convenient charging of multiple devices. It features a built-in retractable Type-C cable, a foldable plug, and dual Type-C ports, making it an ideal solution for travel and daily use. This charger incorporates GaN technology and Tora-Ice cooling to ensure rapid and safe charging performance.

PACKAGE CONTENTS

- TORRAS FlexLine 40W Charger with Built-in Retractable Type-C Cable

SETUP

1. Connecting to Power

1. Unfold the integrated plug from the charger body. The foldable design ensures portability and prevents scratching other items when stored.
2. Insert the charger plug into a standard wall outlet (100-240V compatible).

2. Extending and Retracting the Built-in Cable

1. To extend the built-in Type-C cable, gently pull the cable end until it reaches the desired length. The cable extends up to 0.68 meters (26.8 inches).
2. To retract the cable, pull the cable end slightly further, then release it. The cable will automatically retract back into the charger body.

OPERATING INSTRUCTIONS

1. Single Device Charging

- Connect your device to the built-in retractable Type-C cable. The charger will deliver up to 40W output for fast charging.
- Alternatively, use your own Type-C to Type-C cable and connect it to the additional Type-C port on the charger for up to 40W output.

2. Dual Device Charging

- To charge two devices simultaneously, connect one device using the built-in retractable Type-C cable and another device to the additional Type-C port.
- When both ports are in use, the charger intelligently allocates power, providing 20W to each port for efficient

dual-device fast charging.

MAINTENANCE

To ensure the longevity and optimal performance of your TORRAS FlexLine 40W Charger, please follow these maintenance guidelines:

- Keep the charger clean and free from dust and debris. Use a soft, dry cloth for cleaning.
- Avoid exposing the charger to extreme temperatures, direct sunlight, or high humidity.
- Store the charger in a cool, dry place when not in use. Ensure the foldable plug is retracted to prevent damage.
- Do not attempt to disassemble or repair the charger yourself. Contact customer support for assistance.

TROUBLESHOOTING

If you encounter any issues with your TORRAS FlexLine 40W Charger, please refer to the following common troubleshooting steps:

- **Device not charging:** Ensure the charger is securely plugged into a working wall outlet. Verify that the cable is properly connected to both the charger and your device. Try using a different cable or device to isolate the issue.
- **Slow charging:** Confirm that your device supports fast charging and that the cable you are using is also rated for fast charging. When charging two devices simultaneously, the power output is split (20W per port), which may result in slower charging compared to single-port 40W charging.
- **Charger overheating:** While the charger is designed with advanced cooling technology, prolonged use in poorly ventilated areas or extreme ambient temperatures may cause it to warm up. If the charger feels excessively hot, disconnect it immediately and allow it to cool down. Ensure adequate ventilation during use.
- **Cable not retracting:** Gently pull the cable end slightly further out, then release it. If the issue persists, ensure there are no obstructions in the retraction mechanism.

If these steps do not resolve the issue, please contact TORRAS customer support for further assistance.
