ZMISHIBO ZMCF005 19.7" Low Profile Ceiling Fan with Lights and Remote User Manual

Model: ZMCF005

INTRODUCTION

Welcome to your new ZMISHIBO 19.7" Low Profile Ceiling Fan with Lights and Remote. This manual provides detailed instructions for safe installation, operation, and maintenance of your new ceiling fan. Please read all instructions carefully before beginning installation and retain this manual for future reference.

IMPORTANT SAFETY INSTRUCTIONS

- Always disconnect power at the main circuit breaker before installation or servicing.
- All wiring must be in accordance with national and local electrical codes. If you are unfamiliar with wiring, consult a qualified electrician.
- The fan must be mounted to a structurally sound ceiling joist or outlet box capable of supporting the fan's weight.
- Ensure all connections are tight and secure to prevent electrical shock or fire.
- Do not bend the fan blades during installation or cleaning.
- Keep children away from the fan during operation.
- This product is designed for indoor use only.

INSTALLATION GUIDE

Follow these steps for proper installation. For a visual guide, please refer to the official installation video.

This video provides a step-by-step guide on how to install the ZMISHIBO ceiling fan. It covers unpacking, assembling the fan components, wiring, and mounting the fan to the ceiling.

Step 1: Prepare the Fan Body

Loosen the four canopy screws on the fan motor host. Twist counterclockwise to remove the mounting plate. Thread the screw arm and the wire of the connected port through the fan motor host together. Tug lightly on the wire, keeping it at a certain length to connect the driver. Note that the nut does not need to be tightened at this point to make it easier to adjust the angle of the bracket in the next step. Check if the position of the bracket is correct, and then tighten the nut to facilitate the next step of connecting the lamp body. Lightly tug the wires to the right length, and secure the bracket and light body with screws.

Step 2: Install Fan Blade

Install the fan blade, taking care to secure it by turning it counterclockwise.

Step 3: Connect Wiring

Use the double-sided tape that comes on the back of the driver to secure it inside the back cover. Connect each of the 3 wires to a port on the driver.

Step 4: Mount to Ceiling

Install the ceiling bracket and hang the fan using the safety cable. Connect ceiling wiring, ensuring same color wiring connections (live, neutral, ground) are correctly matched. Secure the fan body to the ceiling bracket with screws.

OPERATING INSTRUCTIONS

Your ZMISHIBO ceiling fan can be controlled via the included remote control or a smart app (Bluetooth required).

Remote Control Functions

- **ON/OFF:** Turns the fan and light on/off.
- **ALL OFF:** Turns off all functions.
- **Light Brightness Adjustment:** Increase or decrease light brightness (10%-100%).
- **Color Temperature Adjustment:** Cycle through warm (3000K), natural (4000K), and white (6000K) light.
- **Night Light Mode:** Activates a dim, warm light setting.
- **Fan Speed:** Select from 6 wind speeds (1-6).
- **F/R (Forward/Reverse) Function:** Changes fan direction for summer (downdraft) or winter (updraft) modes.
- **Timer Setting:** Set a 2-hour timer for automatic shutdown.
- **Code Pair:** For pairing the remote with the fan.

App Control

Download the "Fanlamp Pro" app from Google Play or Apple Store. Follow the in-app instructions for Bluetooth pairing and control.

This image illustrates the dual control options for the ZMISHIBO ceiling fan. On the left, the physical remote control is shown with buttons for light, fan speed, timer, and direction. On the right, a smartphone displays the 'Fanlamp Pro' app interface, mirroring the remote's functions for convenient control.

KEY FEATURES

- **LED Light Source:** Energy-saving LED with 120V output, 2200LM brightness (10%-100% dimmable), and 3 color temperatures (3000K-6000K). Features a light memory function.
- **Reversible DC Motor:** Offers 2 airflow modes for year-round comfort (downdraft for summer, updraft for winter).
- **Quiet Operation:** Pure copper motor ensures smooth operation with low noise (≤30dB).
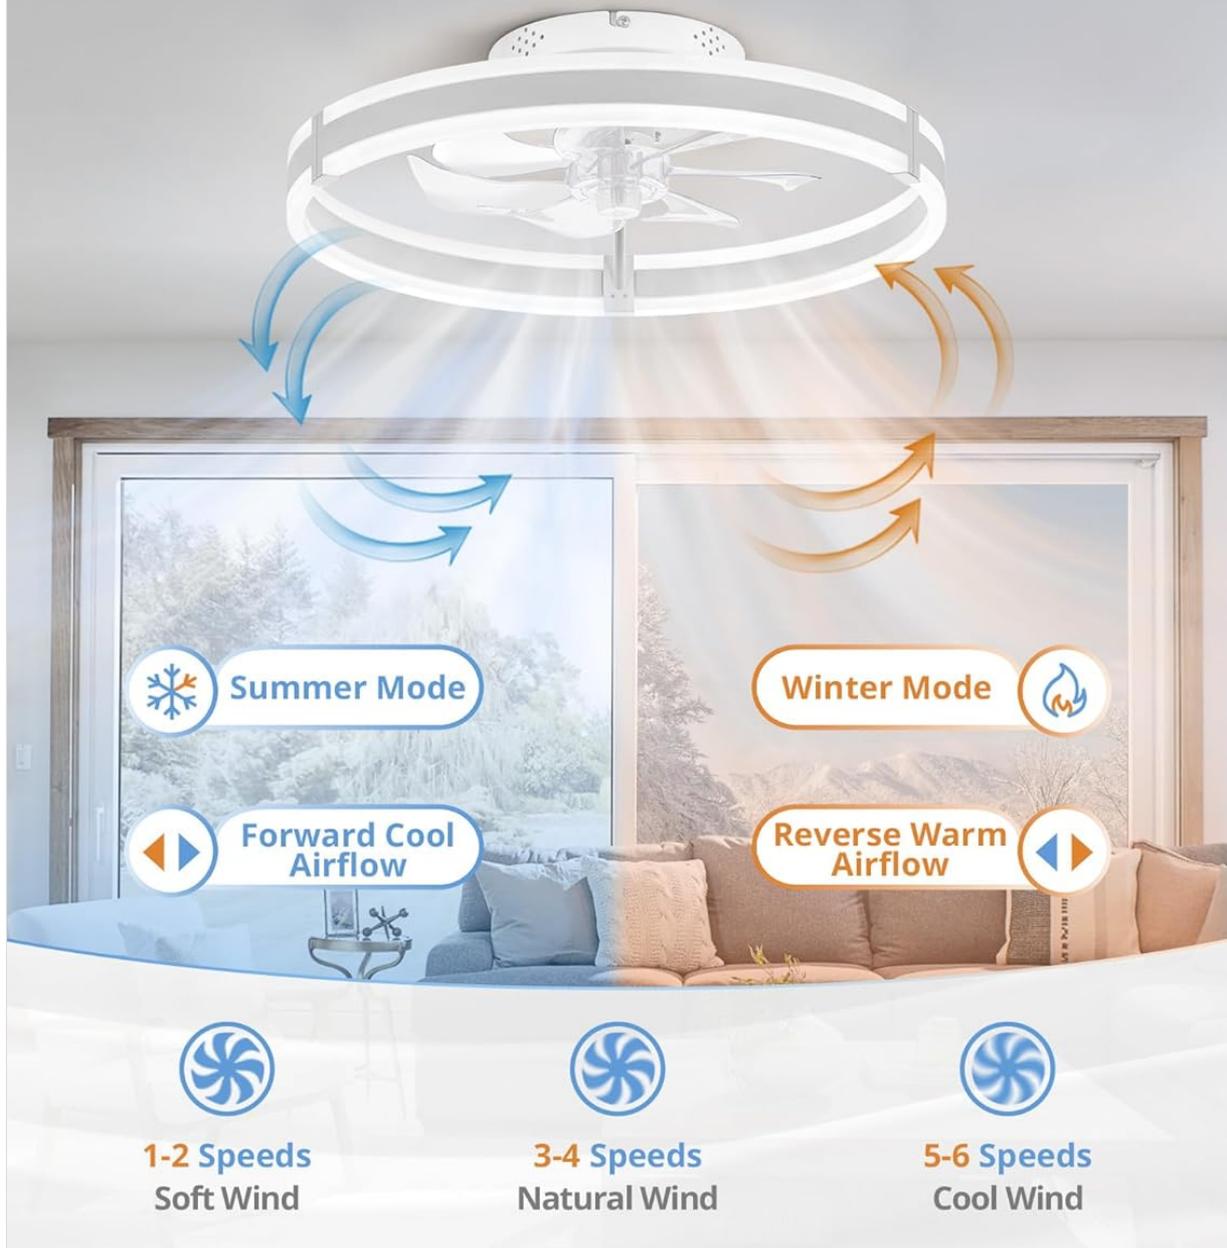

- **6 Wind Speeds:** Provides superior airflow with 7 blades and adjustable speeds from soft to cool wind.
- **Timer Setting:** Convenient 2-hour timer function.

This image visually demonstrates the lighting capabilities of the ZMISHIBO ceiling fan. It shows three distinct color temperatures: warm white (3000K), natural white (4000K), and cool white (6000K). Below, a gradient bar illustrates the smooth dimming function, ranging from 10% to 100% brightness.

TROUBLESHOOTING

Fan Not Operating / Light Not Turning On

- Ensure power is supplied to the fan at the circuit breaker.
- Check all wire connections are secure.
- Verify remote control batteries are correctly installed and charged.
- Ensure the remote is properly paired with the fan (refer to "Code Pair" in operating instructions).

Fan is Noisy

- Check that all screws on the motor housing and mounting bracket are tight.
- Ensure the fan is securely mounted to the ceiling.
- The upgraded remote control eliminates beeping sounds for a peaceful environment.

Light Flickers or Changes Brightness Unexpectedly

- Check for loose wiring connections.
- Ensure the dimmer function is not accidentally activated.
