VEVOR F085-1.5M-092155

VEVOR 36x60 Inch 1.5mm Frosted PVC Table Protector (Model F085-1.5M-092155) Instruction Manual

Brand: VEVOR | Model: F085-1.5M-092155

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your VEVOR 36x60 Inch 1.5mm Frosted PVC Table Protector. This product is designed to offer comprehensive protection for various tabletops, preventing damage from scratches, stains, watermarks, and heat.

The frosted design revitalizes the appearance of your table while maintaining its protective qualities. Crafted from high-quality PVC, it is built for durability and ease of use.

2. SETUP AND INSTALLATION

The table protector is shipped rolled to minimize creasing. Follow these steps to ensure a smooth and flat application:

1. **Unpack and Clean:** Carefully unroll the table protector. Wipe away any dust or debris from both sides of the protector and your tabletop using a damp cloth. Ensure the tabletop is clean and dry before proceeding.
2. **Flattening the Protector:** Due to packaging, the protector may initially have a slight curl. Several methods can help it lay flat:
 - **Hair Dryer Method:** Use a hair dryer on medium heat, holding it approximately 10 cm (4 inches) away from the mat's surface. Gently warm the material to help it relax and flatten.
 - **Weight Application:** Place heavy, flat objects (such as books) evenly across the surface of the protector overnight to encourage it to flatten.
 - **Sunlight Exposure:** Expose the unrolled PVC cover to direct sunlight for several hours. The warmth will help the material become more pliable and flatten.
 - **Warm Water Immersion:** For stubborn curls, steep the protector in warm water for a few minutes, then lay it flat and smooth it out.
3. **Application to Tabletop:** For optimal adhesion and to prevent air bubbles, especially on smooth surfaces like glass, marble, or varnished wood, lightly mist the tabletop with water before placing the protector. Carefully lay the protector flat,

starting from one end and smoothing it out with a plastic sheet or soft cloth to remove any trapped air bubbles.

3. OPERATING INSTRUCTIONS

The VEVOR Table Protector is designed for versatile use across various environments and applications:

- **Surface Protection:** This protector safeguards your tabletop from scratches, spills, watermarks, and heat damage. Its 1.5 mm thickness provides a robust barrier against daily wear and tear.
- **Food Contact Safety:** The PVC material is food-grade, allowing for direct contact with food items without concerns about safety.
- **Heat Resistance:** The protector is heat resistant up to 176°F (80°C). For items hotter than this, such as freshly removed pots or pans, it is recommended to use a placemat or trivet on top of the protector to prevent potential damage.
- **Versatile Applications:** Suitable for a wide range of surfaces including dining tables, kitchen countertops, end tables, computer desks, dressers, and TV cabinets. It is particularly effective on wooden textured desktops.
- **Customization:** The material can be cut to size using sharp scissors or a utility knife if a custom fit is desired.

PREMIUM QUALITY PVC

Safeguard your well-being

SAME PROTECTION, DIFFERENT SCENARIOS

⚠ Place a tablecloth under the table protector when using it on a glass,marble,stoving varnished,white or smooth table top to prevent visible air bubbles

Figure 4: Examples of the table protector used on dining tables, end tables, office desks, and bedside tables.

4. MAINTENANCE AND CLEANING

Maintaining your VEVOR Table Protector is simple due to its waterproof and stain-resistant properties:

- **Daily Cleaning:** For everyday spills and dust, simply wipe the surface with a damp cloth.

- **Stubborn Stains:** For more persistent stains, a mild soap solution can be used. Avoid harsh chemicals or abrasive cleaners, as these may damage the PVC material or affect its clarity.
- **Drying:** After cleaning, dry the surface with a soft, dry cloth to prevent water spots and maintain its clear appearance.

Figure 5: Easy cleaning of spills from the table protector surface.

5. TROUBLESHOOTING

If you encounter issues with your table protector, consider the following common solutions:

- **Problem: Protector is not lying flat.**

Solution: Refer to the "Flattening the Protector" steps in Section 2. Setup and Installation. Applying gentle heat or weights over time will help the material relax and conform to the tabletop.

- **Problem: Air bubbles are visible under the protector.**

Solution: If applying to a very smooth surface (glass, marble, high-gloss wood), ensure the tabletop was lightly misted with water before application. Gently lift a section of the protector and re-smooth it down using a plastic sheet or soft cloth, pushing air bubbles towards the edges.

- **Problem: Protector appears cloudy or has marks.**

Solution: Ensure both the tabletop and the protector are thoroughly cleaned and dried. Avoid using abrasive cleaning tools or harsh chemicals.

6. SPECIFICATIONS

Feature	Detail
Brand	VEVOR
Model Number	F085-1.5M-092155
Material	Polyvinyl Chloride (PVC)
Color	Transparent (Frosted Finish)
Product Dimensions	60"L x 36"W (914.4 x 1524 mm)
Thickness	1.5 mm
Shape	Oblong
Item Weight	5.73 Pounds (2.6 kg)
Special Features	Transparent, 1.5 mm thick, Waterproof, Easy Cleaning, Scratch Resistant, Heat Resistant, Shrink Resistant, Non-Slip
Recommended Uses	Desk, Dining Table, Nightstand, TV Cabinet
Product Care Instructions	Wipe with Damp Cloth
Indoor/Outdoor Usage	Indoor

Item Model Number: F085-1.5M-092155

Material: PVC

Color: Transparent

Shape: Rectangle

Thickness: 1.5 mm

Net Weight: 5.7 lbs / 2.6 kg

Product Size : 36 x 60 inch / 914.4 x 1524 mm
