## 7. TROUBLESHOOTING

If you encounter any issues with your VEVOR CAT793 cat tree, consider the following:

- **Instability:** Ensure all screws and connections are tightened. Verify that the cat tree is placed on a level surface. Confirm the anti-toppling strap is securely anchored to a wall stud.
- **Cats Not Using Scratching Posts:** Encourage use by sprinkling catnip on the sisal posts or gently guiding your cat's paws to the posts. Ensure the posts are stable and appealing.
- **Cats Not Using Condos/Hammock:** Some cats prefer open spaces. Place familiar blankets or toys inside the condos or hammock to make them more inviting.
- **Baskets Seem Small:** The cat tree is designed for small to medium-sized cats. If your cat is larger, they may find the baskets less spacious. Consider adding a soft, flat cushion to make it more comfortable.
- **Damaged Parts:** If any part becomes damaged, discontinue use immediately to prevent injury. Contact VEVOR customer support for replacement parts.
