Papablic Pro

Papablic Fast Bottle Warmer Instruction Manual

Model: Pro | Brand: Papablic

INTRODUCTION

The Papablic Fast Bottle Warmer is designed to quickly and safely warm breastmilk or formula, ensuring it reaches the perfect temperature for your baby. This device offers multiple functions, including fast heating, precise temperature control, a 24-hour keep-warm feature, thawing, food warming, sterilization, and an innovative feeding tracker. Its compact design and universal compatibility make it a versatile tool for busy parents.

KEY FEATURES

- **Fast Heating:** Warms 5 oz of milk in approximately 2 minutes, significantly faster than many standard warmers.
- **Precise Temperature Control:** Advanced technology ensures gentle and accurate heating, preserving nutrients and preventing overheating.
- **High Safety Standards:** Features automatic shut-off upon completion and dry-boil protection, enhancing user safety.
- **Feeding Tracker Function:** An innovative feature that displays the time elapsed since the last heating, aiding in managing feeding schedules.
- **24-Hour Keep-Warm:** Maintains milk at a desired temperature for up to 24 hours, ideal for nighttime feedings.
- **10-in-1 Versatility:** Combines fast heating, thawing, food warming, sterilization, keep-warm, feeding tracker, precise temperature control, adjustable heat settings, auto shut-off, and an anti-scald basket.
- **Universal Compatibility:** Designed to fit most baby bottle brands (e.g., Philips Avent, Comotomo), breastmilk bags,

and baby food jars. Note: Not compatible with Nanobebe & Tommee Tippee bottles.

- **Compact & Space-Saving Design:** Maximizes functionality while occupying minimal counter space.

SAFETY PRECAUTIONS

Please read all instructions carefully before using the Papablic Fast Bottle Warmer. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always ensure the unit is placed on a stable, flat, heat-resistant surface.
- Do not immerse the main unit, cord, or plug in water or other liquids.
- Unplug from the outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.

- Keep out of reach of children. This appliance is not intended for use by persons with reduced physical, sensory, or mental capabilities.
- Use only distilled water for optimal performance and to prevent mineral buildup.
- Do not touch hot surfaces. Use handles or knobs.
- Ensure the water level is appropriate for the selected function to prevent dry-boil.
- Always check the milk temperature before feeding your baby.

GETTING STARTED (SETUP)

Unpacking and Initial Cleaning

1. Carefully remove all components from the packaging.
2. Inspect the unit for any signs of damage. Do not use if damaged.
3. Before first use, clean the warming chamber and accessories (e.g., anti-scald basket) with warm soapy water. Rinse thoroughly and dry.
4. Wipe the exterior of the main unit with a damp cloth. Do not immerse the main unit in water.
5. Place the warmer on a stable, level, and heat-resistant surface near a power outlet.

OPERATING INSTRUCTIONS

The Papablic Fast Bottle Warmer features an intuitive LED display and touch controls for various functions.

Image: A close-up view of the Papablic bottle warmer's LED display and touch control buttons, showing the various function icons and digital readout.

General Operation Steps:

- 1. Place the bottle or food jar into the anti-scald basket, then place the basket into the warming chamber.
- 2. Add the appropriate amount of distilled water to the warming chamber. The water level should be slightly below the rim of the bottle or food jar.
- 3. Plug the unit into a power outlet. The LED display will light up.
- 4. Select the desired function using the touch buttons.
- 5. The unit will automatically shut off once the process is complete.

Specific Operating Modes:

1. Fast Heating Mode

This mode rapidly warms milk to a ready-to-feed temperature.

- Place the bottle with milk into the warmer.
- Add water to the chamber.
- Press the "FAST" button. The warmer will quickly heat the milk.
- The unit will beep and shut off when complete. Always check milk temperature before feeding.

Image: The Papablic bottle warmer in action, showing a bottle being rapidly heated with steam, illustrating its fast warming capability.

2. Precise Temperature Control / Keep Warm Mode

This mode gently heats milk to a precise temperature and can maintain it for up to 24 hours.

- Place the bottle with milk into the warmer.
- Add water to the chamber.
- Press the "KEEP" button. Use the "+" and "-" buttons to adjust the desired temperature.
- The warmer will heat to and maintain the set temperature.
- This function is ideal for preparing milk in advance for late-night feedings.

24-Hour Warmth, Ready Anytime

Emergencies

Ready to Mix Anytime

Ready to Serve Anytime

Image: A mother and baby in a bedroom setting, demonstrating the convenience of the Papablic bottle warmer for late-night feedings, with the warmer ready to mix or serve milk.

3. Thawing Mode

Gently thaws frozen breastmilk or formula, preserving nutrients.

- Place the frozen breastmilk bag or bottle into the warmer.
- Add water to the chamber.
- Select the thawing function (often integrated with a gentle warming mode or specific setting, refer to the display icons).
- The warmer will gently and evenly thaw the milk.

4. Food Warming Mode

Heats baby food jars to a suitable temperature.

- Place the baby food jar into the warmer.
- Add water to the chamber.
- Press the "FOOD" button.

- The warmer will heat the food. Always stir and check temperature before feeding.

5. Sterilization Mode

Uses high-temperature steam to sterilize bottles and small accessories.

- Place clean bottles or accessories upside down in the anti-scald basket.
- Add a small amount of water (e.g., 100ml) to the warming chamber.
- Press the "STERILIZE" button.
- The unit will generate steam to sterilize the items. Be cautious of hot steam when opening.

6. Feeding Tracker Function

Helps parents keep track of the last feeding time.

- After a warming cycle, or at any time, press the "TRACKER" button on the display.
- The screen will show the time elapsed since the last heating cycle.
- This feature assists in maintaining a consistent feeding schedule.

COMPATIBILITY

The Papablic Fast Bottle Warmer is designed for broad compatibility with various feeding products.

- **Bottles:** Compatible with most major baby bottle brands, including Philips Avent and Comotomo.
- **Milk Bags:** Works with standard breastmilk storage bags.
- **Food Jars:** Suitable for heating baby food jars.
- **Note:** This warmer is not compatible with Nanobebe and Tommee Tippee bottles due to their unique shapes.

CARE AND MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your bottle warmer.

Daily Cleaning:

1. Always unplug the unit and allow it to cool completely before cleaning.
2. Empty any remaining water from the warming chamber.
3. Wipe the interior and exterior of the warming chamber with a damp cloth. For stubborn stains, use a mild detergent and rinse thoroughly.
4. Clean the anti-scald basket with warm soapy water and rinse.
5. Do not use abrasive cleaners, scouring pads, or solvents, as these may damage the unit.

Descaling (Monthly or as needed):

Mineral deposits (limescale) can build up in the warming chamber, especially in areas with hard water. Descaling regularly is important for efficient operation.

1. Mix 2 oz (60ml) of white vinegar with 4 oz (120ml) of cold water.
2. Pour the solution into the warming chamber.
3. Plug in the unit and turn it on to the "Sterilize" mode for 5-10 minutes, or until the solution is hot.
4. Unplug the unit and let the solution sit in the chamber for 30 minutes, or until the limescale dissolves.
5. Pour out the solution and rinse the chamber thoroughly with clean water multiple times to remove any vinegar residue.
6. Wipe dry with a clean cloth.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Warmer not turning on.	No power supply; unit not plugged in correctly.	Ensure the power cord is securely plugged into a working outlet. Check the power switch.
Milk not warming or warming too slowly.	Insufficient water in the chamber; limescale buildup; incorrect mode selected.	Add more water to the chamber. Perform descaling. Ensure the correct warming mode is selected.
Unit automatically shuts off prematurely.	Dry-boil protection activated (low water level).	Add sufficient water before starting a cycle.
Display shows an error code.	Internal malfunction.	Unplug the unit, wait a few minutes, then plug it back in. If the error persists, contact customer support.
Limescale buildup visible in the chamber.	Hard water usage.	Perform descaling as per the "Care and Maintenance" section. Use distilled water for future use.

TECHNICAL SPECIFICATIONS

- **Model Number:** Pro

- **Package Dimensions:** 7.76 x 6.22 x 6.18 inches
- **Item Weight:** 2.16 pounds
- **Material Composition:** Plastic
- **Power Source:** Corded Electric (Batteries not required)
- **Features:** 24-hour Keep-Warm, Accurate Temp Control, Automatic Shut Off, Fast Warming, Intelligent Feeding Tracker
