5. TROUBLESHOOTING

If you encounter issues with your Qanba Q3 Obsidian, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Joystick not recognized by PC/Android.	Incorrect input mode selected.	Ensure the compatibility switch is set to the correct mode (D-Input, X-Input, or Android). Try switching modes and reconnecting.
Buttons or joystick unresponsive.	Loose connection or driver issue.	Check USB cable connection. For PC, ensure drivers are up-to-date. Try connecting to a different USB port.

Problem	Possible Cause	Solution
LED lighting not working.	LED function is off or a minor software glitch.	Press the LED button on the function panel to toggle the lighting. If the issue persists, try reconnecting the device.
Trackpad not functioning on PC.	Incorrect input mode.	The trackpad may only function in D-Input mode (P3/PC). Ensure you are in the correct mode.

If these solutions do not resolve the issue, please refer to the support section for further assistance.
