## Claiks 160cm

# Claiks Electric Standing Desk 160x80cm User Manual

Model: 160cm

## INTRODUCTION

---

Thank you for choosing the Claiks Electric Standing Desk. This manual provides essential information for the safe and efficient use of your new desk. Designed for enhanced productivity and comfort, this height-adjustable desk allows you to seamlessly switch between sitting and standing positions, promoting a healthier work environment. Please read these instructions carefully before assembly and operation, and retain them for future reference.

## SETUP AND ASSEMBLY

---

Assembly of the Claiks Electric Standing Desk typically takes approximately 1 hour. For optimal efficiency and to prevent fatigue, an electric screwdriver is highly recommended. Please follow the included diagrams for step-by-step instructions.

### Package Contents

Before beginning assembly, ensure all parts are present and undamaged. Refer to the parts list diagram below.

Image: An exploded view illustrating all components of the Claiks Electric Standing Desk, including desktop panels, frame parts, and assembly hardware.

### Assembly Tips

- **Review Instructions:** Carefully read all assembly steps before starting.
- **Organize Parts:** Lay out all components and hardware, matching them against the parts list.
- **Electric Screwdriver:** Use an electric screwdriver with appropriate bits for faster and easier assembly.
- **Two-Person Assembly:** While possible for one person, having a second person can make assembly easier, especially when handling the desktop.
- **Transmission Rod:** Ensure the transmission rod is fully and securely inserted into its designated holes to prevent operational issues.

## デスク寸法

## OPERATION

The Claiks Electric Standing Desk features intuitive controls for height adjustment and memory presets, allowing you to customize your workspace effortlessly.

### Height Adjustment

- **Range:** The desk can be adjusted between 72cm and 118cm.
- **Speed:** The lifting speed is approximately 20mm/s.
- **Control Panel:** Use the **Up** and **Down** arrows on the control panel to manually adjust the desk to your desired height.

## Memory Presets

The desk features a memory function to store up to three preferred heights for quick recall.

1. Adjust the desk to your desired height using the Up/Down arrows.
2. Press the **M** button (if available, or a dedicated 'Set' button) followed by one of the numbered memory buttons (**1**, **2**, or **3**) to save the current height.
3. To recall a saved height, simply press the corresponding numbered button (**1**, **2**, or **3**). The desk will automatically move to the stored position.

## MAINTENANCE

---

Proper care and maintenance will ensure the longevity and optimal performance of your Claiks Electric Standing Desk.

### Cleaning the Desktop

- The desktop surface is made of melamine resin, which is resistant to water, heat, and stains.
- For daily cleaning, wipe the surface with a soft, damp cloth.
- For stubborn stains, use a mild soap solution and then wipe dry immediately.
- Avoid using abrasive cleaners, harsh chemicals, or solvents, as these can damage the surface finish.

### Frame and Mechanism

- Periodically check all screws and bolts to ensure they are tight. Retighten if necessary.
- Keep the lifting columns free from dust and debris. Wipe with a dry cloth.
- Do not lubricate the lifting mechanism unless specifically instructed by customer support.
- Ensure power cables are not pinched or damaged.

## TROUBLESHOOTING

---

If you encounter any issues with your Claiks Electric Standing Desk, refer to the following common troubleshooting steps.

### Desk Not Moving or Responding

- **Power Connection:** Ensure the power cable is securely plugged into both the desk and a working wall outlet.
- **Transmission Rod:** Verify that the transmission rod connecting the lifting columns is fully and correctly inserted into its designated holes. A loose connection can prevent movement.
- **Overload:** Check if the desk is overloaded. The maximum load capacity is 80kg. Remove excess weight and try again.
- **Reset:** Some desks have a reset function. Consult the full manual or contact support for specific reset procedures.

### Unusual Noises During Operation

- While the desk is designed for quiet operation (approx. 45dB), minor sounds are normal.
- If you hear grinding, clicking, or excessively loud noises, stop operation immediately.
- Check for any obstructions under or around the desk that might be interfering with the lifting mechanism.
- Ensure all assembly screws are tight.

### Uneven Lifting

- This can often be resolved by performing a reset procedure.
- Ensure the desk is on a level surface.
- Verify that the transmission rod is properly connected and not bent.

If these steps do not resolve the issue, please contact Claiks customer support for further assistance.
