Povanjer Hot/Cold Faucet Indicator Instruction Manual

1. INTRODUCTION AND OVERVIEW

The Povanjjer Hot/Cold Faucet Indicator is designed to provide a clear visual distinction between hot and cold water on faucet handles. This product helps users quickly identify water temperature, enhancing safety and convenience in various settings.

Each indicator features distinct red (hot) and blue (cold) markings. Made from durable polypropylene, these indicators are suitable for use in kitchens, bathrooms, and on other compatible faucet types where clear temperature identification is beneficial.

This package includes 20 hot/cold faucet indicators, each with an approximate diameter of 8.8 mm.

2. SETUP AND INSTALLATION

The Povanjer Hot/Cold Faucet Indicators are designed for straightforward installation on compatible faucet handles. No special tools are required.

Installation Steps:

1. **Identify the Faucet Handle:** Locate the designated slot or recess on your faucet handle where the hot/cold indicator is intended to be placed.
2. **Align the Indicator:** Take one Povanjer Hot/Cold Faucet Indicator. Ensure the red dot (hot) or blue dot (cold) is oriented correctly according to your faucet's design.
3. **Insert and Secure:** Gently press the indicator into the slot or recess on the faucet handle. Apply firm, even pressure until the indicator is securely seated and flush with the handle surface.
4. **Verify Placement:** Once installed, ensure the indicator is stable and does not easily dislodge.

3. OPERATING INSTRUCTIONS

The Povanjer Hot/Cold Faucet Indicator serves as a passive visual aid. Its operation is straightforward:

- **Identify Water Temperature:** Before operating the faucet, observe the indicator on the handle. The red dot signifies hot water, and the blue dot signifies cold water.
- **Prevent Accidental Burns:** By clearly indicating the water temperature, the indicator helps users, especially children or those unfamiliar with the faucet, to avoid accidental burns or discomfort from unexpectedly hot or cold water.

Image 3.1: The indicator provides a clear visual cue for water temperature.

4. MAINTENANCE

To ensure the longevity and clear visibility of your Povanjer Hot/Cold Faucet Indicators, follow these simple maintenance guidelines:

- **Cleaning:** The indicators can be cleaned with a soft, damp cloth. Use mild soap if necessary.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or harsh chemicals, as these may damage the surface finish or fade the color markings.
- **Inspection:** Periodically check the indicators for any signs of wear or damage. If an indicator becomes loose or damaged, replace it with a new one from the pack.

5. TROUBLESHOOTING

While the Povanjer Hot/Cold Faucet Indicators are designed for universal fit on compatible handles, minor issues may arise. Here are some common troubleshooting tips:

- **Indicator Does Not Fit:** Ensure the indicator is correctly aligned with the specific shape and size of the recess on your faucet handle. Some faucet designs may have unique indicator slots. Verify the

diameter of your faucet's indicator slot matches the 8.8mm diameter of these indicators.

- **Indicator is Loose:** If the indicator feels loose after installation, remove it and re-insert it, applying firm and even pressure. Ensure it clicks or seats securely into place. If it continues to be loose, the slot on your faucet handle might be slightly larger than the indicator, or the indicator itself might be slightly undersized for that specific slot.
- **Markings are Fading:** While made from durable material, prolonged exposure to harsh cleaning agents or extreme conditions might affect the markings over time. Refer to the maintenance section for proper cleaning. If fading occurs, replace the indicator.

6. SPECIFICATIONS

Feature	Detail
Product Name	Hot/Cold Faucet Indicator
Brand	Povanjer
Model Number	LJ08XN65QV5PNSND
Material	Polypropylene
Color	Silver with Red (Hot) and Blue (Cold) markings
