Brother AX-15 Electronic Typewriter User Manual

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Brother AX-15 Electronic Typewriter. Please read this manual thoroughly before using your typewriter to ensure proper function, optimal performance, and longevity of the device.

PRODUCT OVERVIEW

Image: The Brother AX-15 Electronic Typewriter, showcasing its full keyboard, paper feed mechanism, and control panel. Key features visible include the pitch selection (10 and 12), automatic lift-off correction memory, and the Brother brand logo.

1. SETUP

1.1 Unpacking

- Carefully remove the typewriter and all accessories from the packaging.
- Retain the packaging for future transport or storage.

1.2 Power Connection

1. Ensure the typewriter's power switch is in the OFF position.
2. Connect the power cord to the power input on the typewriter.
3. Plug the other end of the power cord into a standard electrical outlet.

1.3 Ribbon and Correction Tape Installation

The Brother AX-15 uses a cassette-type daisy wheel and ribbon system for easy replacement.

1. Open the ribbon cover, typically located at the top of the typewriter.
2. Align the new ribbon cassette with the guides and press down gently until it clicks into place.
3. Install the correction tape cassette in a similar manner, ensuring it is properly seated.
4. Close the ribbon cover.

1.4 Paper Loading

1. Place the paper against the paper guide on the left side of the platen.
2. Turn the platen knob (usually on the right side) to feed the paper into the typewriter until it is securely in position.
3. Adjust the paper bail rollers to hold the paper flat against the platen.

2. OPERATING INSTRUCTIONS

2.1 Basic Typing

- Turn on the typewriter using the power switch.
- Begin typing on the keyboard. The characters will appear on the paper.
- Use the **SPACE BAR** for spaces and the **RETURN** key to advance to the next line.

2.2 Pitch Selection

The Brother AX-15 supports dual 10 and 12 pitch typing, and potentially 15 pitch, allowing for different character densities per inch.

- Locate the pitch selection switch or button on the control panel.
- Select the desired pitch (e.g., 10 for larger characters, 12 for smaller characters).

2.3 Correction Functions

The typewriter features automatic lift-off correction memory for character, word, and line correction.

1. To correct a single character, press the **CORRECT** key immediately after typing the incorrect character. The typewriter will lift off the error.
2. For word or line correction, use the appropriate correction keys (if available) or repeatedly use the **CORRECT** key while backspacing over the error.

2.4 Bold Print

To emphasize text, the Brother AX-15 can produce bold print.

- Locate the **BOLD** print function key.
- Press the **BOLD** key before typing the text you wish to bold. Press it again to deactivate.

2.5 Repeat Typing

The typewriter supports repeat typing for all keys and functions.

- To repeat a character or function, press and hold the desired key. The action will repeat until the key is

released.

3. MAINTENANCE

3.1 Ribbon Replacement

When the print quality deteriorates, it is time to replace the ribbon cassette.

1. Ensure the typewriter is turned off.
2. Open the ribbon cover.
3. Carefully remove the used ribbon cassette by lifting it out.
4. Install a new ribbon cassette as described in Section 1.3.

3.2 Cleaning

- Regularly dust the exterior of the typewriter with a soft, dry cloth.
- Use a small brush or compressed air to remove dust and debris from the keyboard and print head area.
- Avoid using liquid cleaners directly on the typewriter components.

4. TROUBLESHOOTING

This section addresses common issues you might encounter with your Brother AX-15 Electronic Typewriter.

4.1 Paper Jams

- If paper jams, turn off the typewriter immediately.
- Carefully pull the paper out in the direction of the paper feed, avoiding tearing.
- Ensure paper is loaded correctly and not wrinkled before re-attempting.

4.2 Faint or Uneven Print

- Check if the ribbon cassette is correctly installed.
- The ribbon may be worn out and require replacement.
- Ensure the correct pitch setting is selected for the desired output.

4.3 Typewriter Not Responding

- Verify that the power cord is securely connected to both the typewriter and the electrical outlet.
- Check if the power switch is in the ON position.
- If the issue persists, try plugging the typewriter into a different outlet.

5. SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
Model	Brother AX-15
Type	Electronic Typewriter
Pitch Options	10, 12, 15 (selectable)
Correction Memory	Automatic lift-off correction (character, word, line)

2 admin Fonix proudly introduces DECTalk version 5 01 E1 the world s most intelligible text to speech TTS synthesizer now with a 30016 Emic Epson DECTalk 501 Users Guide 370413 mouser datasheet 321 ||| Fonix proudly introduces DECTalk version 5.01-E1, the world s most intelligible text-to-speech TTS synthesizer, now with a more natural sounding voice. DECTalk has the smallest memory footprint in the industry for a full featured, multi-language voice synthesizer. DECTalk s small footprint allows it to be used in devices with a TTS engine using up to 10% of the memory. 5.01-E1 supports three languages: U.S. English, Canadian & Latin American Spanish.

It also offers two voices, Paul and Wendy. DECTalk comes with an easy to use API as well as Microsoft Speech API, so you can give your application a natural sounding voice. DECTalk has more than 1,400 built-in voices as well as extensive text preprocessing, so it correctly speaks monetary text like \$1.25, or place holder [12.21 pm] or date Jan 1, 2004, and even phone numbers: 400 231 4650. Price DECTalk. Hear it for yourself.
