Once connected, the Yoidesu Mini Speakers operate by playing audio from your source device. They are designed for personal listening, providing sound that is audible to the user without being disruptive to others nearby.

- **Power On/Off:** The speakers do not have a separate power button. They are active when connected to an audio source that is playing sound.
- **Volume Control:** Adjust the volume using the controls on your connected audio device.
- **Audio Playback:** Start playing audio (music, podcast, audiobook) on your device, and the sound will be emitted through the speakers.
