Versatile Wearing Options

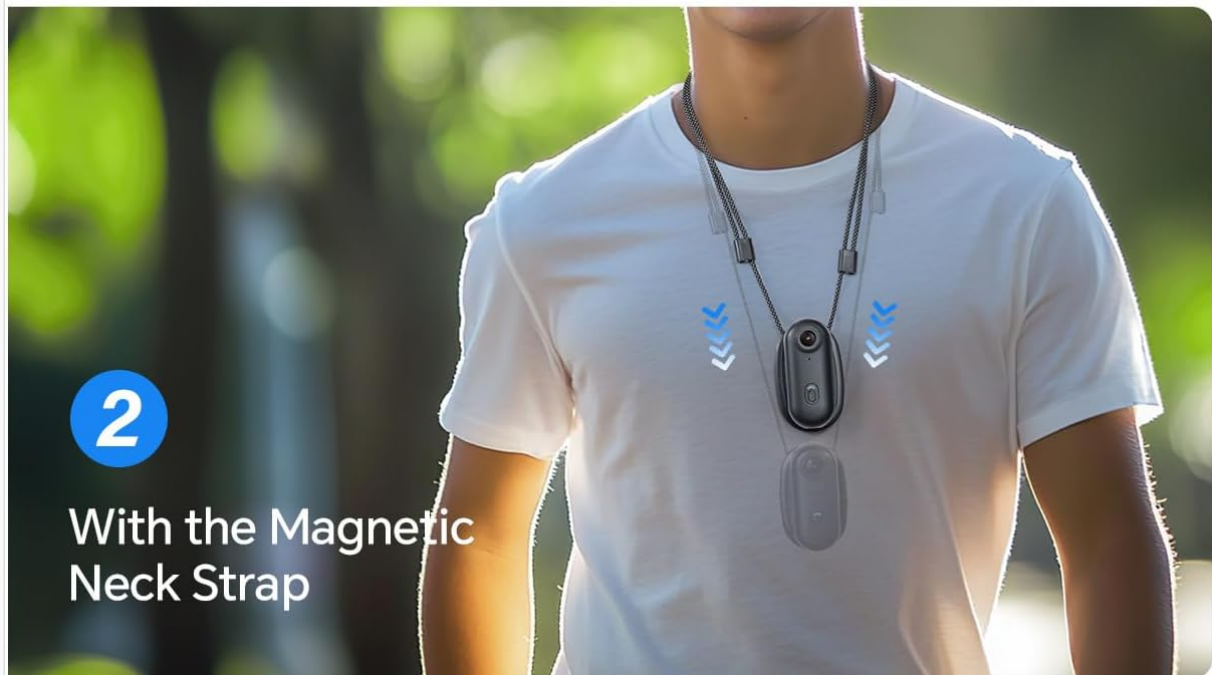

Image: The camera offers versatile wearing options, including a back clip and magnetic neck strap.

SETUP

1. Charging the Camera

Before first use, fully charge your BOBLOV W4 camera. Connect the camera to a USB power source (e.g., computer USB port or wall adapter) using the provided USB-C cable. The indicator light will show charging status and turn off when fully charged.

2. Inserting the Memory Card

The BOBLOV W4 comes with a 64GB Micro SD card installed. Ensure the card is properly seated in the Micro SD card slot. If replacing the card, use a high-speed Micro SD card (Class 10 or higher) up to 256GB for optimal performance.

3. Connecting to Computer

To access recorded files, connect the camera to your computer using the USB cable. The camera is compatible with both Windows and Mac operating systems. You can also use the included card reader for direct access to the Micro SD card.

What will you get?

- * W4 Body Camera
- * Back Clip
- * Magnetic Neck Strap
- * USB Cable
- * User Manual
- * Adapter

OPERATING INSTRUCTIONS

Power On/Off and Recording

The BOBLOV W4 features a simple one-button operation for ease of use.

- **Power On:** Press and hold the main button until the indicator light turns on.
- **Start Recording:** From standby mode, a short press of the main button will start recording. The button will vibrate and blink blue.
- **Stop Recording:** While recording, a short press of the main button will stop recording.
- **Power Off:** Press and hold the main button until the indicator light turns off.

Low Battery Warning

When the battery life is less than 15 minutes, the low battery warning status will be activated. The red flashing indicator will flash 5 times every 5 minutes, prompting you to charge the device.

Loop Recording

The camera supports loop recording, meaning that when the memory card is full, it will automatically overwrite the oldest video files to continue recording. This ensures continuous capture without manual deletion of old files.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution. Avoid harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For long-term storage, ensure the battery is charged to about 50%. Recharge every few months to prevent deep discharge.
- **Water Resistance:** This camera is *Not Water Resistant*. Avoid exposure to water or high humidity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Low battery; device frozen.	Charge the camera fully. If unresponsive, try resetting the device (refer to the full user manual for reset instructions).
Camera not recording.	Memory card full or corrupted; incorrect operation.	Check memory card capacity and format if necessary. Ensure correct one-click recording procedure is followed.
Shaky video footage.	Lack of image stabilization; excessive movement during recording.	The W4 does not have optical image stabilization. Minimize movement during recording or use in stable environments. Consider mounting options that reduce vibration.
Cannot connect to computer.	Faulty USB cable; driver issue; camera not in data transfer mode.	Try a different USB cable or port. Ensure the camera is powered on and recognized by the computer. Use the included card reader as an alternative.

For more detailed troubleshooting steps, please refer to the complete user manual included in your package or visit the official BOBLOV support website.
