ATUMTEK ATYK185

ATUMTEK ATYK185 Bluetooth Camera Remote Shutter User Manual

Model: ATYK185

INTRODUCTION

The ATUMTEK ATYK185 Bluetooth Camera Remote Shutter provides wireless control for your smartphone or tablet camera. This device is designed for ease of use, allowing you to capture photos and videos from a distance of up to 10 meters (33 feet). It features Bluetooth 5.2 technology for stable and rapid connections, universal compatibility with iOS and Android devices, and a long-lasting CR2032 battery.

WHAT'S IN THE BOX

Upon unboxing your ATUMTEK ATYK185, you will find the following items:

- 2 x ATUMTEK Bluetooth Camera Remote Shutters (Model: ATYK185)
- 2 x Detachable Wrist Straps
- 1 x User Manual
- 2 x CR2032 Batteries (pre-installed)

Image: The ATUMTEK ATYK185 package contents, including two black remote shutters, two wrist straps, the product box, and the user manual.

Setup

Pairing with Your Device

1. **Power On:** Locate the ON/OFF switch on the side of the remote shutter. Slide the switch to the "ON" position. The blue indicator light on the remote will rapidly flash, indicating it is in Bluetooth pairing mode.

2. **Enable Bluetooth:** On your smartphone or tablet, go to your device's settings and enable Bluetooth.

3. **Connect:** In the list of available Bluetooth devices, locate and tap on "ATUMTEK". A pairing request may appear; confirm by tapping "Pair". The blue indicator light on the remote will turn off, signifying a successful connection.

4. **Open Camera App:** Return to your device's camera application. The remote is now ready for use.

One Step Auto Pairing

Simply switch on the power button, and the remote will automatically reconnect to the last paired device

OPERATING INSTRUCTIONS

Taking Photos and Recording Videos

- **For Photos:** With your camera app open and in photo mode, briefly press the large camera button on the remote to capture a photo.

- **For Videos:** Switch your camera app to video recording mode. Briefly press the large camera button on the remote to start recording. Press it again to stop recording.

The remote operates within a 10-meter (33-foot) range, providing flexibility for various shooting scenarios, including selfies, group photos, and remote nature shots.

Definition and Explanation of Bluetooth Functionality

| In standby state, the indicator light flashes | In connection state, the indicator light goes off | After 5 minutes of no pairing, the device will enter sleepmode, and the indicator light goes off | In low battery mode, the indicator light turns off, the connection is lose |

Image: Various usage scenarios demonstrating the versatility of the remote shutter for different types of photography and videography.

Sleep Mode and Waking Up

- **Sleep Mode:** If there is no operation for 10 minutes after powering on, the remote will automatically enter sleep mode to conserve battery. The blue indicator light will deactivate.

- **Waking Up:** To wake up the remote from sleep mode, simply press the camera button briefly. It will automatically reconnect to the last paired device if Bluetooth is enabled on your phone.

Work Seamlessly with Almost All Andriod and iOS Devices

- iPhone
- Android
- iPad
- Andriod Tablets

MAINTENANCE

Battery Replacement

The ATUMTEK ATYK185 uses an upgraded CR2032 button battery, which supports the capture of up to 20,000 images. When the battery is low, the indicator light will turn off, and the connection may be lost. To replace the battery:

1. Locate the battery compartment on the back of the remote.

2. Use a small coin or a similar tool to gently twist open the battery cover.

3. Remove the old CR2032 battery and insert a new one, ensuring the positive (+) side faces upwards.

4. Close the battery cover securely.

Using the Wrist Strap

The detachable wrist strap provides an extra layer of security and portability. To attach and use the wrist strap:

1. Thread the thin loop of the wrist strap through the small hole on the remote shutter.

2. Pass the larger part of the strap through the loop to secure it.

3. Adjust the buckle on the strap to fit comfortably around your wrist.
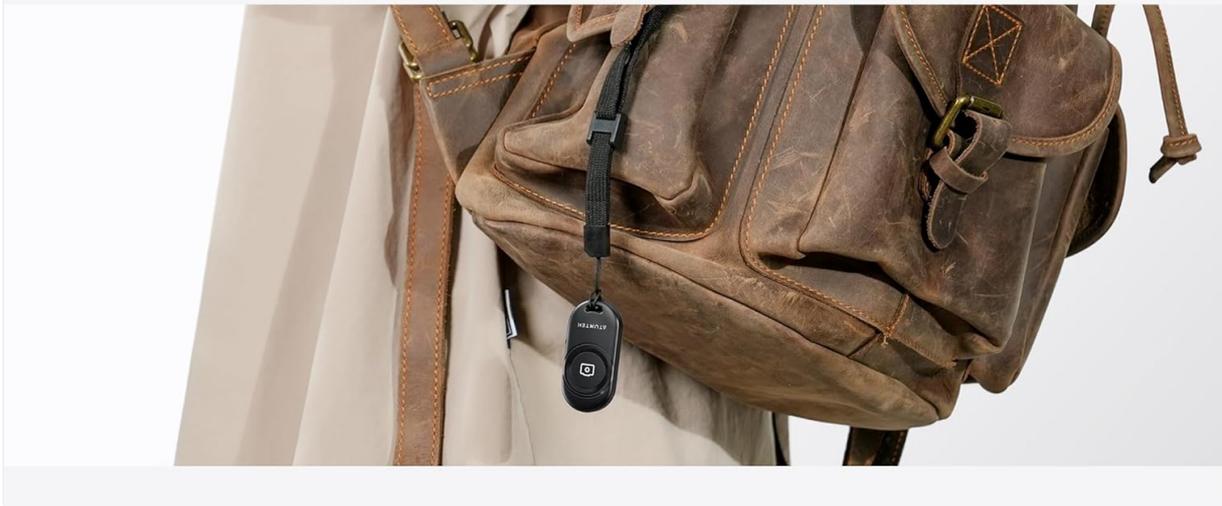

Compact & Portable Design

TROUBLESHOOTING

- **Remote not pairing:**

    - Ensure the remote is switched "ON" and the blue indicator light is flashing.

    - Make sure Bluetooth is enabled on your smartphone/tablet.

    - Check if the remote is already paired with another device. Disconnect from other devices if necessary.

    - Restart your smartphone/tablet and try pairing again.

    - If the blue light is not flashing, the battery might be dead. Replace the CR2032 battery.

- **Remote not taking photos/videos:**

    - Ensure the remote is successfully paired (blue light off after initial pairing).

    - Verify that your camera app is open and active.

    - Some phones may require the volume button to be set as the shutter button in camera settings.

- Ensure the remote is within the 10-meter operating range of your device.

- **Remote enters sleep mode too quickly:**

  - The remote is designed to enter sleep mode after 10 minutes of inactivity to save battery. This is normal operation. Simply press the camera button to wake it up.
