

PHILIPS SCY906/11

Philips Avent Natural Response Baby Bottle SCY906/11 Instruction Manual

Model: SCY906/11 | Capacity: 330ml | Nipple Flow: 4 (Fast)

1. PRODUCT OVERVIEW

The Philips Avent Natural Response Baby Bottle is designed to support your baby's natural feeding rhythm, similar to breastfeeding. The unique nipple features a slit and tip that release milk only when your baby actively drinks. When your baby pauses to swallow and breathe, the milk flow stops, promoting a natural feeding experience.

Image 1.1: Philips Avent Natural Response Baby Bottle (330ml) with Flow 4 nipple.

Key Features:

- **Natural Response Nipple:** Milk flows only when baby actively sucks, mimicking natural breastfeeding.
- **Anti-Drip Nipple Design:** Prevents milk leakage from the tip when not actively feeding.
- **Anti-Colic Valve:** Integrated valve designed to reduce colic and discomfort by preventing air ingestion.
- **Breast-Shaped Nipple:** Wide, soft, and flexible nipple designed to imitate the shape and feel of a breast for easy latch-on.
- **Ergonomic Design:** Easy for parents to hold and for toddlers to grasp.
- **BPA-Free Material:** Made from polypropylene, ensuring safety for your baby.
- **Easy to Clean and Assemble:** Features fewer parts for straightforward cleaning and assembly.

2. SETUP AND ASSEMBLY

Before first use, and after each subsequent use, disassemble all parts and clean them thoroughly. Sterilize all components before the first use.

Assembly Steps:

1. Ensure all parts are clean and sterilized.
2. Insert the nipple into the screw ring from the top, pulling it until it is securely seated.
3. Place the assembled nipple and screw ring onto the bottle and twist until tight.
4. Secure the dome cap over the nipple for hygienic storage or transport.

*D'après un test réalisé à domicile réalisé en Allemagne (n=55), 96 % des bébés ont accepté ce biberon après 3 tétées.

3. OPERATING INSTRUCTIONS

Feeding Your Baby:

1. Prepare formula or breast milk according to instructions and fill the bottle. Ensure the liquid is at a safe feeding temperature.
2. Assemble the bottle as described in Section 2.
3. Position your baby comfortably. The Natural Response nipple is designed to allow your baby to control the flow, similar to breastfeeding.

4. Observe your baby's feeding cues. Milk will only be released when your baby actively sucks.
5. After feeding, remove the bottle and burp your baby.

Understanding Nipple Flow Rates:

The Philips Avent Natural Response range offers various nipple flow rates to accommodate your baby's development. This bottle comes with a Flow 4 nipple, suitable for babies 3 months and older, or those who prefer a faster flow.

4. MAINTENANCE AND CLEANING

Proper cleaning and sterilization are crucial for your baby's health. Always clean all parts immediately after each use.

Cleaning Steps:

1. Disassemble all parts of the bottle.
2. Wash all components in warm, soapy water using a soft brush or sponge. Ensure all milk residue is removed.
3. Rinse thoroughly under clean running water.
4. The bottle and its components are dishwasher-safe (top rack only).

Sterilization:

Sterilize all parts before the first use and regularly thereafter. Sterilization methods include:

- **Boiling:** Place disassembled parts in boiling water for 5 minutes.
- **Steam Sterilizer:** Use a Philips Avent steam sterilizer or another suitable sterilizer according to its instructions.
- **Microwave Sterilizer:** The bottle is microwave-safe. Use a microwave sterilizer according to its instructions.

Store clean and dry parts in a covered container.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Milk not flowing or flowing too slowly.	Baby not actively sucking; nipple clogged; incorrect nipple flow rate for baby's age/preference.	Ensure baby is actively sucking. Check nipple for blockages and clean if necessary. Consider a faster flow nipple if baby is older or frustrated (refer to flow rate chart). It is natural for 2-3 attempts to be needed for a baby to get milk when using a new bottle.
Milk leaking from the nipple.	Nipple not properly seated in the screw ring; screw ring not tightened sufficiently; nipple damage.	Re-seat the nipple in the screw ring. Ensure the screw ring is tightened securely to the bottle. Inspect the nipple for tears or damage and replace if found.
Baby experiencing colic or discomfort.	Air ingestion during feeding.	Ensure the anti-colic valve is clear and functioning. Position the bottle so the nipple is always full of milk. Burp your baby frequently during and after feeding.
Baby refusing the bottle.	Preference for breast; unfamiliarity with bottle; incorrect milk temperature.	Allow for a transition period. Ensure milk is at body temperature. Try different feeding positions. Have another caregiver offer the bottle.

6. PRODUCT SPECIFICATIONS

Feature	Detail
Model Number	SCY906/11
Brand	Philips Avent
Capacity	330 Milliliters (11 oz)
Material	Polypropylene (BPA-free)
Nipple Type	Natural Response, Angled

Weight (approx.)	130 grams

7. SAFETY INFORMATION

- Always use this product with adult supervision.
- Never use feeding nipples as a soother.
- Continuous and prolonged sucking of fluids will cause tooth decay.
- Always check food temperature before feeding.
- Keep all components not in use out of children's reach.
- Inspect before each use and pull the feeding nipple in all directions. Throw away at the first signs of damage or weakness.
- Do not leave the feeding nipple in direct sunlight or heat, or leave in disinfectant ("sterilizing solution") for longer than recommended, as this may weaken the nipple.

8. WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the documentation provided with your purchase or visit the official Philips Avent website. Keep your proof of purchase for any warranty claims.
