3. SETUP AND INSTALLATION

Follow these steps to properly install the tube onto your Akitas V8 cordless vacuum cleaner.

1. **Ensure Power Off:** Before installation, ensure your Akitas V8 vacuum cleaner is turned off and disconnected from any charging source.
2. **Identify Connection Points:** Locate the connection point on the main body of your Akitas V8 vacuum cleaner and the connection point on your desired cleaning head (e.g., floor brush, crevice tool).
3. **Attach to Main Body:** Align the wider end of the Akitas V8 tube with the connection point on the main vacuum body. Push firmly until it clicks securely into place.
4. **Attach Cleaning Head:** Align the narrower end of the Akitas V8 tube with the connection point on your chosen cleaning head. Push firmly until it clicks securely into place.
5. **Verify Connection:** Gently pull on both ends of the tube to ensure it is firmly attached and will not detach during

use.

Note: Do not force connections. If the tube does not attach easily, check for proper alignment or obstructions.

4. OPERATING INSTRUCTIONS

Once the tube is securely installed, operate your Akitas V8 vacuum cleaner as usual. The tube extends the reach of your vacuum, allowing you to clean floors, ceilings, and other hard-to-reach areas effectively.

- **Ergonomic Use:** Hold the vacuum cleaner by its handle and guide the cleaning head using the tube.
- **Reach Extension:** Utilize the extended length to clean under furniture, high corners, or other areas that would otherwise be inaccessible.
- **Detachment:** To detach the tube, press the release button (if present on your vacuum model) and pull the tube away from the main body or cleaning head.

5. MAINTENANCE

Regular maintenance ensures the tube remains clear and functional.

1. **Check for Blockages:** Periodically inspect the tube for any debris, dust, or larger objects that may cause a blockage.
2. **Clear Blockages:** If a blockage is found, detach the tube from the vacuum and carefully remove the obstruction using a long, blunt object (e.g., a broom handle). Do not use sharp objects that could damage the tube.
3. **Wipe Clean:** Wipe the exterior of the tube with a damp cloth to remove dust and dirt. Do not immerse the tube in water.
4. **Storage:** Store the tube in a clean, dry place away from direct sunlight and extreme temperatures.
