SETUP INSTRUCTIONS

1. **Unpack the Scale:** Carefully remove the scale from its packaging.
2. **Install Batteries:** Locate the battery compartment on the underside of the scale. Insert the two AAA batteries (included) according to the polarity indicators (+/-).
3. **Placement:** Place the scale on a hard, flat, and level surface. Avoid placing it on carpet or uneven flooring, as this can affect accuracy.
4. **Initial Calibration:** For the first use, or if the scale has been moved, gently step on the scale until a reading appears, then step off. The display will show '0.0' or 'CAL' and then turn off. This calibrates the scale for accurate subsequent readings.

1. **Weighing:** Step onto the scale with bare feet, standing still and centered on the platform. The display will show your weight.
2. **Unit Conversion:** If your scale supports both pounds (lb) and kilograms (kg), there will be a button on the underside or side of the scale to switch between units. Press this button to select your preferred unit of measurement.
3. **Consistent Readings:** For the most consistent results, weigh yourself at the same time each day, preferably in the morning, on a flat, hard surface, and wearing similar clothing or no clothing.
