Reebok BB6004

Reebok Elite Basketball VR-4K Series User Manual

Model: BB6004 | Brand: Reebok

1. INTRODUCTION

The Reebok Elite Basketball VR-4K Series is designed for superior performance and durability, suitable for both indoor and outdoor play. Featuring a durable composite leather cover and anti-slip grip, this basketball ensures optimal control and consistent shape retention. The included pump and needle allow for easy inflation and maintenance, ensuring your ball is always ready for the game.

2. WHAT'S IN THE BOX

Upon unboxing your Reebok Elite Basketball VR-4K Series, please verify that all components are present:

- Reebok Elite Basketball (VR-4K Series)
- Inflation Pump
- Inflation Needle

3. SETUP

3.1 Initial Inflation

The Reebok Elite Basketball is delivered deflated to prevent damage during transit. Follow these steps to inflate your basketball:

1. Carefully unpackage the basketball, pump, and needle.
2. Attach the inflation needle securely to the pump nozzle.
3. Locate the inflation valve on the basketball. It is typically a small, rubberized opening.
4. Moisten the needle with a drop of water or saliva before inserting it into the valve. This helps prevent damage to the valve.
5. Gently insert the needle straight into the valve. Avoid forcing it or inserting it at an angle.
6. Begin pumping air into the basketball. Pump slowly and steadily.
7. Inflate the ball until it is firm to the touch but still has a slight give. Refer to the recommended pressure (PSI) usually printed near the valve on the ball. Do not overinflate, as this can damage the ball.
8. Once inflated, carefully remove the needle by pulling it straight out.

PUMP

WITH INFLATION NEEDLE

- Ergonomic pump handle
- Great for travel

4. OPERATING INSTRUCTIONS

4.1 General Use

The Reebok Elite Basketball VR-4K Series is designed for versatile gameplay. Its composite leather cover and anti-slip grip provide excellent control for dribbling, passing, and shooting. The Shooter Seam Technology enhances grip and recognition for improved accuracy.

- **Indoor Play:** The ball's construction is well-suited for indoor court surfaces, offering consistent bounce and feel.
- **Outdoor Play:** While durable, prolonged use on abrasive outdoor surfaces like asphalt or concrete may lead to increased wear. The versatile design allows for outdoor use, but be mindful of surface conditions.

Designed for ultimate **outdoor durability**

4.2 Optimal Performance

For optimal performance, ensure the ball is inflated to the recommended pressure. A properly inflated ball will have a true rebound and consistent bounce, thanks to its rotationally balanced butyl bladder and polyester winding for shape retention.

Image 4.2: The Reebok Elite Basketball in action, demonstrating its flight path towards a hoop, indicative of its true rebound technology.

5. MAINTENANCE

5.1 Cleaning

To clean your basketball, wipe it down with a damp cloth. For tougher dirt, a mild soap solution can be used. Avoid harsh chemicals or abrasive cleaners, as these can damage the composite leather cover.

5.2 Storage

Store the basketball in a cool, dry place away from direct sunlight and extreme temperatures. Prolonged exposure to heat or cold can affect the ball's material and air retention.

5.3 Air Pressure Check

Regularly check the air pressure of your basketball. If the ball feels soft, re-inflate it using the provided pump and needle to the recommended PSI. This ensures consistent performance and extends the lifespan of the ball.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Ball loses air quickly	Improperly seated needle during inflation, valve leak, or small puncture.	Ensure needle is inserted straight and fully. Check valve for debris. If leak persists, inspect ball for punctures.
Poor bounce	Under-inflation or over-inflation.	Adjust air pressure to the recommended PSI.
Difficulty inserting needle	Valve is dry or misaligned.	Moisten needle before insertion. Ensure needle is aligned directly with the valve opening.
Surface wear/damage	Frequent use on abrasive surfaces.	Minimize use on rough outdoor courts if possible. Clean regularly to remove abrasive particles.

7. SPECIFICATIONS

Feature	Detail
Brand	Reebok
Model Number	BB6004
Material	Composite Leather (Faux Leather)
Color	Orange
Age Range (Description)	Youth
Item Weight	0.79 Kilograms (1.74 pounds)
Sport	Basketball
Item Diameter	9.51 Inches
Number of Items	1 (Basketball, Pump, Needle)
Construction Type	Stitched
UPC	681066120842
Country of Origin	Vietnam
Manufacturer	Sakar International, Inc.

8. WARRANTY AND SUPPORT

For information regarding product warranty, returns, or technical support, please refer to the documentation included with your purchase or contact the retailer where the product was acquired. You may also visit the official Reebok website or contact Sakar International, Inc., the manufacturer, for further assistance.

Manufacturer: Sakar International, Inc.
