Setup and Assembly

Assembly typically requires two adults. Ensure you have ample space and all parts are accounted for before starting.

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface (like a rug or blanket) to prevent scratches.
2. **Identify Parts:** Refer to the included parts list and diagrams to identify each component.
3. **Assemble Headboard:** Attach the side panels to the headboard storage unit. Ensure the charging station is correctly oriented and secured.
4. **Attach Side Rails:** Connect the side rails to the assembled headboard and footboard using the provided hardware. Do not overtighten screws until all parts are aligned.
5. **Install Support Slats:** Place the plywood slats across the side rails. Secure them according to the instructions to ensure a stable mattress foundation. The robust design eliminates the need for a box spring.
6. **Connect Power Cord:** Plug the 5 ft power cord from the charging station into a suitable wall outlet.
7. **Final Tightening:** Once all components are in place and aligned, securely tighten all screws and bolts.

Troubleshooting

If you encounter issues, refer to the following common solutions:

  - Check all assembly hardware and tighten any loose bolts or screws.
  - Ensure slats are properly seated and not rubbing against the frame.
- **Charging Station Not Working:**
  - Verify the bed frame's power cord is securely plugged into a functional wall outlet.
  - Test the outlet with another device to confirm it has power.
  - Ensure your device's charging cable is fully inserted into the USB/Type-C port.
- **LED Light Not Turning On:**
  - Check if the bed frame's power cord is connected to a live outlet.
  - Ensure the side switch for the LED light is in the 'On' position.
