SAFETY INFORMATION

Please observe the following safety precautions to prevent injury and damage to the product:

- Always assemble the cabinet on a soft, clean surface to prevent scratches.
- Ensure all parts are present and undamaged before beginning assembly. Do not proceed with assembly if any parts are missing or broken.
- Use the provided hardware and tools only. Do not substitute with other hardware unless explicitly instructed.
- Tighten all screws and fasteners securely, but do not overtighten, as this may strip the threads or damage the material.
- For stability, it is highly recommended to secure the cabinet to a wall using the anti-tipping hardware provided, especially if children or pets are present in the household.
- Do not overload shelves or drawers. Distribute weight evenly to maintain stability.
- Keep small parts and packaging materials away from children to prevent choking hazards.

SETUP AND ASSEMBLY

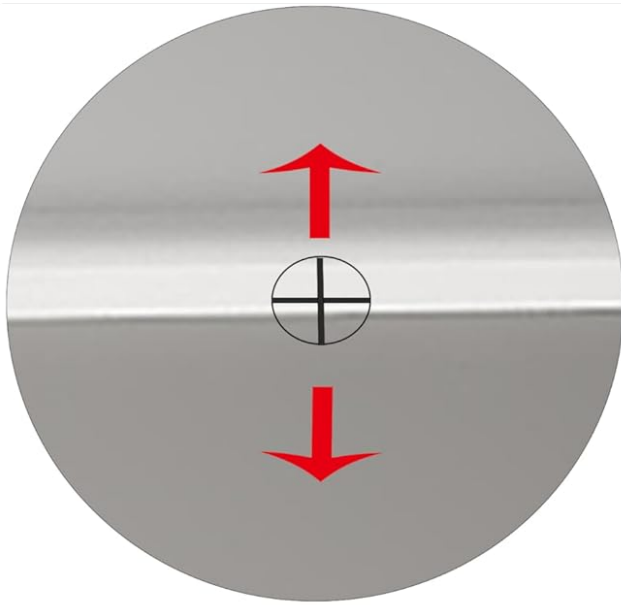

Assembly of the OneBlis Tall Bathroom Storage Cabinet requires basic tools and can typically be completed by one person. Follow these general steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a protected surface and compare them against the parts list (usually included in a separate diagram).
2. **Assemble the Base:** Attach the side panels to the bottom panel, ensuring proper alignment. Secure with the designated fasteners.
3. **Install Drawer Slides:** Mount the drawer slides to the interior side panels according to the pre-drilled holes.
4. **Assemble the Drawer:** Construct the drawer box and attach the drawer front. Insert the assembled drawer onto the installed slides.
5. **Attach Door Hinges and Door:** Secure the hinges to the door and then attach the door to the main cabinet frame. Adjust hinges as needed for proper door alignment.
6. **Install Shelves:** Place the adjustable shelves into the desired positions within the open compartments and behind the door. Ensure shelf pins are fully inserted.
7. **Attach Back Panel:** Secure the back panel to the rear of the cabinet using small nails or screws.
8. **Final Placement and Securing:** Move the assembled cabinet to its final location. Attach the anti-tipping hardware to the top rear of the cabinet and secure it to a wall stud or appropriate wall anchor.

OPERATING AND USAGE

The OneBlis Tall Bathroom Storage Cabinet is designed for versatile storage. Here's how to best utilize its features:

- **Open Shelves:** The three open shelves at the top are ideal for frequently accessed items, decorative displays, or toiletries. Their open design allows for quick access and visibility.
- **Drawer:** The integrated drawer provides enclosed storage for smaller items such as cosmetics, grooming tools, or accessories, keeping them neatly organized and protected from moisture.
- **Lower Cabinet with Door:** The spacious lower cabinet, accessible via a swinging door, is suitable for larger items like cleaning supplies, extra towels, or bulkier toiletries. This enclosed space helps keep items dry and out of sight.
- **Adjustable Shelves:** Both the open shelves and the shelf behind the door feature adjustable partitions. You can reposition these shelves to different heights to accommodate items of various sizes, maximizing storage efficiency.

MAINTENANCE

To ensure the longevity and appearance of your OneBlis storage cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the finish.
- **Spills:** Promptly wipe up any spills to prevent water damage or staining, especially in a bathroom environment.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain structural integrity.
- **Avoid Direct Sunlight/Heat:** Prolonged exposure to direct sunlight or extreme heat can cause fading or warping of the material.

TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

Problem	Possible Cause	Solution
Cabinet feels wobbly or unstable.	Loose fasteners; uneven floor; not secured to wall.	Check and tighten all screws. Ensure the cabinet is on a level surface; use shims if necessary. Secure the cabinet to the wall using the anti-tipping hardware.
Drawer does not slide smoothly.	Drawer slides misaligned; debris in slides.	Ensure drawer slides are correctly installed and aligned. Clean any dust or debris from the slides.
Door does not close properly or is misaligned.	Hinges are loose or improperly adjusted.	Tighten hinge screws. Adjust hinge settings (usually via screws on the hinge itself) to align the door.
Surface scratches or marks.	Abrasion from objects; improper cleaning.	Use a furniture repair pen or touch-up paint matching the cabinet color for minor scratches. Clean with a soft, damp cloth only.
