ASSEMBLY INSTRUCTIONS

Full assembly is needed. It is suggested that 2 people assemble this bed frame. Clear instructions and pre-drilled holes make installation hassle-free.

1. **Unpack and Identify Parts:** Carefully unpack all components and hardware. Lay them out on a clean, soft surface to prevent scratches. Refer to the parts list to ensure everything is accounted for.
2. **Attach Side Rails to Headboard:** Align the side rails with the pre-drilled holes on the headboard. Secure them using the provided bolts and washers. Do not fully tighten yet.
3. **Attach Side Rails to Footboard:** Connect the other end of the side rails to the footboard, aligning holes and securing with bolts and washers. Once all four corners are connected, gently tighten all bolts.
4. **Install Center Support Beam:** Place the center support beam along the middle of the bed frame. Secure it to the headboard and footboard brackets using the appropriate hardware.
5. **Place Wood Slats:** Evenly space the wood slats across the bed frame, resting them on the side rail ledges and the center support beam. Some slats may have pre-drilled holes for optional securing screws; use them if available.
6. **Final Tightening:** Once all components are in place, go back and securely tighten all bolts and screws. Do not overtighten.

CARE AND MAINTENANCE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning the Upholstery:** For general cleaning, gently vacuum the velvet fabric using an upholstery attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner. Avoid harsh chemicals.
- **Hardware Check:** Periodically (every 3-6 months) check all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the fabric to fade.
- **Moving the Bed:** When moving the bed, lift it rather than dragging it to prevent damage to the frame and your flooring.

TROUBLESHOOTING

If you encounter any issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed is wobbly or unstable	Loose hardware connections.	Check and tighten all bolts and screws securely.
Squeaking noises	Loose hardware or slats rubbing against the frame.	Tighten all hardware. Ensure slats are properly seated and not rubbing. Apply felt pads if necessary.
