## LocoLee B0DCBQVRPH

# LocoLee LED Light Kit for LEGO 21350 Jaws (Standard Version) Instruction Manual

Model: B0DCBQVRPH

### INTRODUCTION

---

This document provides comprehensive instructions for the installation and operation of your LocoLee LED Light Kit, designed specifically for the LEGO 21350 Jaws building set (Standard Version). This kit enhances your LEGO model with dynamic lighting effects. **Please note: The LEGO 21350 Jaws model is not included with this light kit and must be purchased separately.**

- LED Light Kit components (various high-brightness lights, LED strip, expansion board, connecting cables)
- Instruction Manual (digital access)
- Power Supply (USB cable, battery box - batteries not included)

## SETUP AND INSTALLATION

Follow these steps to install your LED light kit onto your LEGO 21350 Jaws model. It is recommended to install the lights as you build the LEGO set, or carefully integrate them into an already assembled model.

- 1. Access Digital Instructions:** This kit does not include a paper instruction manual. To access the detailed PDF and video installation guides, please:
  - Visit the website printed in the booklet provided in your package.
  - Enter the model number or code found on the back of the packing box.
  - Click on the picture to view the PDF and video tutorials.
- 2. Test Components:** Before beginning installation, test each light part to ensure it is functioning correctly.

3. **Integrate Lights:** Carefully follow the digital instructions to integrate the LED lights and wiring into your LEGO model. The design allows for the wires to be hidden for a clean appearance.
4. **Connect Expansion Board:** Connect the individual light wires to the expansion board as indicated in the instructions.
5. **Power Connection:** Connect the expansion board to the power supply. The light kit can be powered by USB (voltage less than 5V). Batteries for the battery box are not included.

## OPERATING INSTRUCTIONS

Once the LED light kit is fully installed and connected to a power source:

- Ensure the power source (USB or battery box) is active.
- The lights will illuminate, bringing your LEGO model to life.
- For optimal brightness, use a USB power source.

**Your browser does not support the video tag.**

## MAINTENANCE

To maintain the longevity and appearance of your LED light kit:

- Keep the model and light components free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the light kit to excessive moisture or direct sunlight, which can degrade materials over time.
- Handle wires and connections gently to prevent damage.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Lights do not turn on.	<ul style="list-style-type: none"> <li>◦ Loose connection.</li> <li>◦ Incorrect power supply.</li> <li>◦ Faulty light component.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Check all wire connections to the expansion board and power supply.</li> <li>◦ Ensure the USB power source is active and providing less than 5V. If using a battery box, check batteries.</li> <li>◦ Refer to the online instructions for specific testing procedures.</li> </ul>
Lights are dim.	<ul style="list-style-type: none"> <li>◦ Insufficient power.</li> <li>◦ Battery depletion (if using battery box).</li> </ul>	<ul style="list-style-type: none"> <li>◦ Ensure a stable power supply. USB power generally provides brighter lights than batteries.</li> <li>◦ Replace batteries in the battery box.</li> </ul>
Some lights are not working.	<ul style="list-style-type: none"> <li>◦ Damaged wire or light.</li> <li>◦ Loose connection to the expansion board.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Carefully inspect the non-working lights and their connections.</li> <li>◦ Ensure wires are securely plugged into the correct ports on the expansion board.</li> </ul>
