SETUP AND INSTALLATION

Your Tylza beverage refrigerator is designed for both under-counter built-in and freestanding use. Proper installation is crucial for performance and longevity.

Unpacking and Placement

Carefully remove all packaging materials. Ensure the unit is placed on a flat, stable surface. Allow the refrigerator to stand upright for at least 24 hours before plugging it in to allow the refrigerant to settle.

Reversible Door

Easily reverses the door opening direction for different scenarios

Reversible Door Installation

The door is reversible, allowing it to open from either the left or right side to suit your space. Follow these steps to reverse the door swing:

1. **Step 1: Remove the door handle.** Unscrew the handle from the door.
2. **Step 2: Remove the plug from the door frame at the door handle position, and reinstall the door handle.** This prepares the opposite side for the handle.
3. **Step 3: Remove the door hinge.** Carefully detach the door from the unit by unscrewing the hinges.
4. **Step 4: Installation of new door hinges.** Attach the new hinges (if provided, or re-use existing ones on the opposite side) to the desired side of the unit.
5. **Step 5: Reinstall the plug in the door frame at the door handle position. Done.** Secure the door to the new hinges.

Security Lock

The tempered glass door includes a key lock at the bottom for added security, preventing unauthorized access.

MAINTENANCE

Cleaning

Regular cleaning helps maintain the refrigerator's appearance and efficiency. Unplug the unit before cleaning. Use a soft cloth with a mild detergent and warm water to clean the interior and exterior surfaces. The shelves are removable for easy cleaning. Ensure all parts are dry before plugging the unit back in.

Automatic Defrost

The refrigerator features an automatic defrost system, minimizing the need for manual defrosting. Any accumulated

frost will melt and evaporate automatically.

TROUBLESHOOTING

If you experience issues with your beverage refrigerator, please refer to the following common problems and solutions:

- **Unit does not operate:** Check if the power cord is properly plugged into the outlet. Ensure the circuit breaker is not tripped.
- **Temperature is not cold enough:** Verify the temperature setting is appropriate. Avoid frequent door openings. Ensure the door is fully closed and sealed. Check for proper ventilation around the unit.
- **Unit is noisy:** Some operating noise from the compressor and fan is normal. Ensure the unit is on a level surface and not touching any walls or cabinets.
- **Door does not close properly:** Check if shelves are correctly positioned. Ensure the unit is level. Inspect the door gasket for any damage or obstructions.

For issues not resolved by these steps, please contact customer support.
