MYbrushnice ANWIEL (Compatible Electric Toothbrush)

MYbrushnice Replacement Toothbrush Heads for ANWIEL Electric Toothbrush

User Manual

INTRODUCTION

This manual provides instructions for the proper installation, usage, and maintenance of your MYbrushnice Replacement Toothbrush Heads, designed for compatibility with ANWIEL electric toothbrushes. Adhering to these guidelines will ensure optimal performance and longevity of the product.

SETUP AND INSTALLATION

The MYbrushnice replacement heads are specifically engineered to provide a secure and precise fit with ANWIEL electric toothbrushes.

- 1. Remove the Old Toothbrush Head:** Gently pull the old toothbrush head straight off the ANWIEL electric toothbrush handle.
- 2. Align the New Head:** Take a new MYbrushnice replacement toothbrush head. Align it with the metal shaft on the toothbrush handle.
- 3. Firmly Press into Place:** Press the new head down firmly onto the handle until you hear or feel a click. This indicates a secure connection.

An image showing the 10-pack of MYbrushnice replacement toothbrush heads in black, designed for ANWIEL electric toothbrushes.

USAGE GUIDELINES

Once installed, the MYbrushnice replacement head functions identically to the original ANWIEL toothbrush head. Its high-quality, rounded bristles are designed for effective plaque removal and gum health, providing a gentle yet thorough cleaning experience.

- **Brush Gently:** Guide the brush head slowly from tooth to tooth, allowing the bristles to do the work. Avoid pressing too hard.
- **Follow Toothbrush Instructions:** Refer to your ANWIEL electric toothbrush's original manual for specific brushing techniques and recommended brushing times.

MAINTENANCE

Proper maintenance ensures hygiene and extends the life of your toothbrush heads.

- **Rinse After Each Use:** After each brushing session, rinse the toothbrush head thoroughly under running water to remove any toothpaste residue and debris.

- **Store Upright:** Store the toothbrush head in an upright position to allow it to air dry completely.
- **Replace Regularly:** Replace the toothbrush head every 3 months, or sooner if the bristles become frayed or show signs of wear. Frayed bristles are less effective at cleaning and can potentially harm gums.

TROUBLESHOOTING

If you encounter issues with your replacement toothbrush heads, consider the following:

- **Head Does Not Fit Securely:** Ensure the replacement head is firmly pressed onto the ANWIEL electric toothbrush handle until it clicks. If the head still does not fit securely or feels loose, double-check that your electric toothbrush is indeed an ANWIEL model, as these heads are specifically designed for ANWIEL compatibility.
- **Reduced Cleaning Performance:** If you notice a decrease in cleaning effectiveness, it may be time to replace the brush head. Bristles wear down over time, typically requiring replacement every 3 months.

SPECIFICATIONS

Feature	Detail
Brand Name	MYbrushnice
Compatible Devices	ANWIEL Electric Toothbrushes
Age Range Description	Adult
Size	1 Count (Pack of 10)
Number of Pieces	10
Unit Count	10 Count
Number of Items	10
