TYMO HC507PM

TYMO ROVY Hair Waver Curling Iron User Manual

Model: HC507PM

INTRODUCTION

Welcome to the user manual for your TYMO ROVY Hair Waver Curling Iron. This 3-barrel ionic hair curler is designed to help you achieve beautiful beach waves with ease. Featuring 9 heat settings, fast heating, and an anti-scald design, it is travel-friendly and suitable for various hair types. Please read this manual thoroughly before use to ensure safe and optimal performance of your device.

The TYMO ROVY Hair Waver Curling Iron, featuring a sleek pink design and 1-inch barrels, ready for use.

SAFETY INFORMATION

It is crucial to adhere to the following safety guidelines to prevent injury or damage to the device:

- Avoid contact with hot surfaces of the curling iron during and immediately after use.
- Keep the device away from water and other liquids. Do not use near bathtubs, showers, basins, or other vessels containing water.
- Do not use the device with wet hands.
- Ensure the device is kept away from flammable materials.
- Be mindful of heat exposure to your hair and scalp during use to prevent burns or damage.
- Always unplug the device when not in use and before cleaning.
- Do not leave the device unattended when plugged in.
- Keep out of reach of children.

PRODUCT OVERVIEW AND FEATURES

The TYMO ROVY Hair Waver is engineered for efficiency and user safety, incorporating several advanced features:

- **Easy Clamp, Instant Wave:** Designed for quick and effortless styling, allowing you to create beachy waves with a simple clamping motion.
- **No Exposed Barrel, No Burns:** Features a full-wrap insulation design to protect fingers and neck from direct contact with hot surfaces, enhancing user safety.
- **Voluminous All Day:** The 1-inch (25mm) barrel size is optimized for creating larger, more luxurious beach waves. Advanced dual-sided heating technology ensures waves maintain their shape and endurance for extended periods.
- **Fast & Stable Heating:** Equipped with 4 built-in PTC heating elements, enabling the device to heat up four times faster, reaching desired temperatures within 30 seconds. The PTC temperature control system provides precise and consistent heating, safeguarding hair from excessive heat damage.
- **Damage Worry-Free:** Emits 40 million negative ions to neutralize static, resulting in silky, frizz-free waves. The patented T-GLOSS tourmaline ceramic coating, infused with nourishing essence, contributes to healthier hair with each use.

COMPARE	 TYMO DEEP WAYER	 TRADITIONAL WAYER	 FLAT/CURLING IRON
EASY	✓ One Clamp Set Waves	/	✗ Skills needed
RELIABLE	✓ Defined Big Waves	✗ Flat texture	✗ Unpredictable
SAFE	✓ Full-wrap Insulation	✗ Exposed barrel	✗ Exposed barrel

This image illustrates the key advantages of the TYMO Deep Waver, highlighting its ease of use, reliability in creating defined big waves, and full-wrap insulation for safety, in comparison to traditional wavers and flat/curling irons.

40 MILLION NEGATIVE IONS

Reduce Damage, Boost Shine

The diagram demonstrates how 40 million negative ions work to reduce hair damage and enhance shine, contributing to healthier-looking waves.

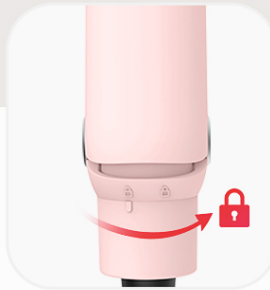

Dual Voltage 100-240V

For travel:
No need to worry about voltage compatibility issues, you can use your devices worldwide.

30 Mins Auto-off

Safety & energy efficiency:
Reduce energy consumption, decrease carbon emissions, and protect the environment.

Handle Lock

Less accidental burns:
Effectively prevent accidental switch activation, reducing the risk of burns.

80-Inch Swivel Cord

Convenient use:
The lightweight and flexible design of the power cord makes it suitable for travel or mobile office scenarios.

Key features for convenience and safety: Dual Voltage for global travel, 30-minute auto-off for energy efficiency, a handle lock to prevent accidental burns, and an 80-inch swivel cord for flexible use.

SETUP

Before first use, ensure the device is clean and free from any packaging materials. Plug the curling iron into a suitable electrical outlet. The device is designed with dual voltage (100-240V) for worldwide compatibility.

BUILT-IN STYLING TIMER

Consistent Results
Avoid Overheating

Timing button

4 Styling timer settings for all hair types
Timer can be turned off with a long press

The LED display on the TYMO ROVY Hair Waver shows the current temperature and allows for timer settings, ensuring precise control over your styling.

OPERATING INSTRUCTIONS

Follow these steps to achieve optimal results with your TYMO ROVY Hair Waver:

1. **Prepare Hair:** Ensure your hair is clean, dry, and detangled. For best results and protection, apply a heat protectant spray.
2. **Power On and Set Temperature:** Plug in the device. Use the temperature controls to select your desired heat setting. The device offers 9 heat settings from 230-430°F. Consider using a temperature 20-80°F lower than your regular setting due to the larger heating surface area.
3. **Set Timer (Optional):** Utilize the built-in styling timer for consistent results and to avoid overheating. The timer can be adjusted and turned off with a long press of the timing button.
4. **Section Hair:** Divide your hair into manageable sections, typically 1-2 inches wide, depending on your hair thickness and desired wave intensity.

5. **Position the Iron:** Place the iron near the roots of a hair section, ensuring the full-wrap insulation protects your scalp.
6. **Clamp and Hold:** Gently clamp the hair between the barrels and hold for a few seconds. The timer will assist in consistent application.
7. **Move Down Hair:** Release the clamp and move the iron down the length of the hair, overlapping the previous wave slightly to create a continuous pattern.
8. **Repeat:** Continue this process for all sections of your hair.
9. **Finish:** Once all sections are waved, allow your hair to cool completely before running your fingers through it or applying any finishing products to set the waves.

STUNNING MERMAID WAVES

Voluminous · Energetic · Shine

EASY 3 STEPS TO GO

Clamp

Release

Repeat

Achieve stunning mermaid waves in three simple steps: Clamp the hair, Release the iron, and Repeat the process down the hair strand.

EASY WAVES

Clamp and release

Forget complex curling skill

This image shows the TYMO ROVY curler in action, highlighting how easily users can create waves by simply clamping and releasing, eliminating the need for complex curling skills.

MAINTENANCE

Proper maintenance ensures the longevity and performance of your TYMO ROVY Hair Waver:

- **Cleaning:** Ensure the device is unplugged and completely cool before cleaning. Wipe the barrels and exterior with a soft, damp cloth. Do not use abrasive cleaners or immerse the device in water.
- **Storage:** Store the curling iron in a cool, dry place, away from direct sunlight and moisture. Utilize the handle lock feature for compact and safe storage.
- **Cord Care:** Do not wrap the power cord tightly around the device, as this can damage the cord. Store the cord loosely.

TROUBLESHOOTING

Here are some common questions and solutions regarding the TYMO ROVY Hair Waver:

Why does my hair appear burned/damaged?

The crimper has a larger heating surface area compared to traditional curling irons, which can result in slightly more heat exposure to the hair.

- Use temperatures **20-80°F lower** than your regular setting.
- Always apply a **heat protectant spray** before styling.

Why does smoke come out while in use?

When using the crimper, moisture from the hair doesn't evaporate slowly like with traditional curling irons. Instead, it gets trapped inside when clamped and releases instantly when opened, creating the appearance of 'smoke'. This is typically steam, not smoke from burning hair.

- Use a lower heat setting and timer.
- Make sure hair is **clean and dry** before styling.
