Typhur WT05

Typhur Sync Gold Wireless WiFi Meat Thermometer User Manual

Model: WT05

1. INTRODUCTION

Thank you for choosing the Typhur Sync Gold Wireless WiFi Meat Thermometer. This device is designed to provide precise temperature monitoring for various cooking methods, including grilling, smoking, oven baking, and air frying. Featuring advanced Sub-1 GHz wireless technology and multiple sensors, it ensures accurate and reliable readings for perfect culinary results.

This manual provides detailed instructions for setting up, operating, and maintaining your Sync Gold thermometer. Please read it thoroughly before use to ensure optimal performance and longevity of your device.

2. WHAT'S IN THE Box

- Typhur Sync Device Base x 1
- Meat Probe x 2
- Charging Cable x 1
- User Manual x 1
- 3 C Batteries (pre-installed or included separately)

Image: The Typhur Sync Gold Smart Base and two wireless meat probes, illustrating the main components included in the package.

3. SETUP GUIDE

3.1 Initial Charging and Power On

- Insert Batteries:** Ensure the 3 C batteries are correctly inserted into the Sync Gold Device Base.
- Charge Probes:** Place the meat probes into the charging slots on the Sync Gold Device Base. The probes will begin charging automatically. A full charge is recommended before first use.
- Power On:** The device base will power on automatically when probes are inserted or when connected to power.

3.2 Connecting to the Typhur App (Optional)

While the Sync Gold base can operate independently, connecting to the Typhur app provides enhanced features and remote monitoring.

- Download App:** Download the "Typhur" app from your smartphone's app store.

2. **Create Account:** Follow the in-app instructions to create an account or log in.
3. **Pair Device:** Follow the app's prompts to pair your Sync Gold Device Base. Ensure your smartphone's Bluetooth and Wi-Fi are enabled. The device uses Sub-1 GHz technology for probe-to-base communication and Wi-Fi for base-to-app communication, offering extended range.

Unlimited WiFi Range

Use our unique, standalone Smart Base or the Typhur app

Image: Connectivity diagram illustrating how the probes communicate with the Smart Base via Sub-1 GHz technology, and the Smart Base connects to the Typhur App via Wi-Fi for extended range monitoring.

4. OPERATING INSTRUCTIONS

4.1 Inserting the Probe

Carefully insert the probe into the thickest part of the meat, avoiding bones. Ensure the probe is inserted deep enough so that all internal sensors are within the meat for accurate internal temperature readings. The ambient tip sensor should be exposed to the cooking environment.

Six Optimally Placed Sensors for Higher Accuracy

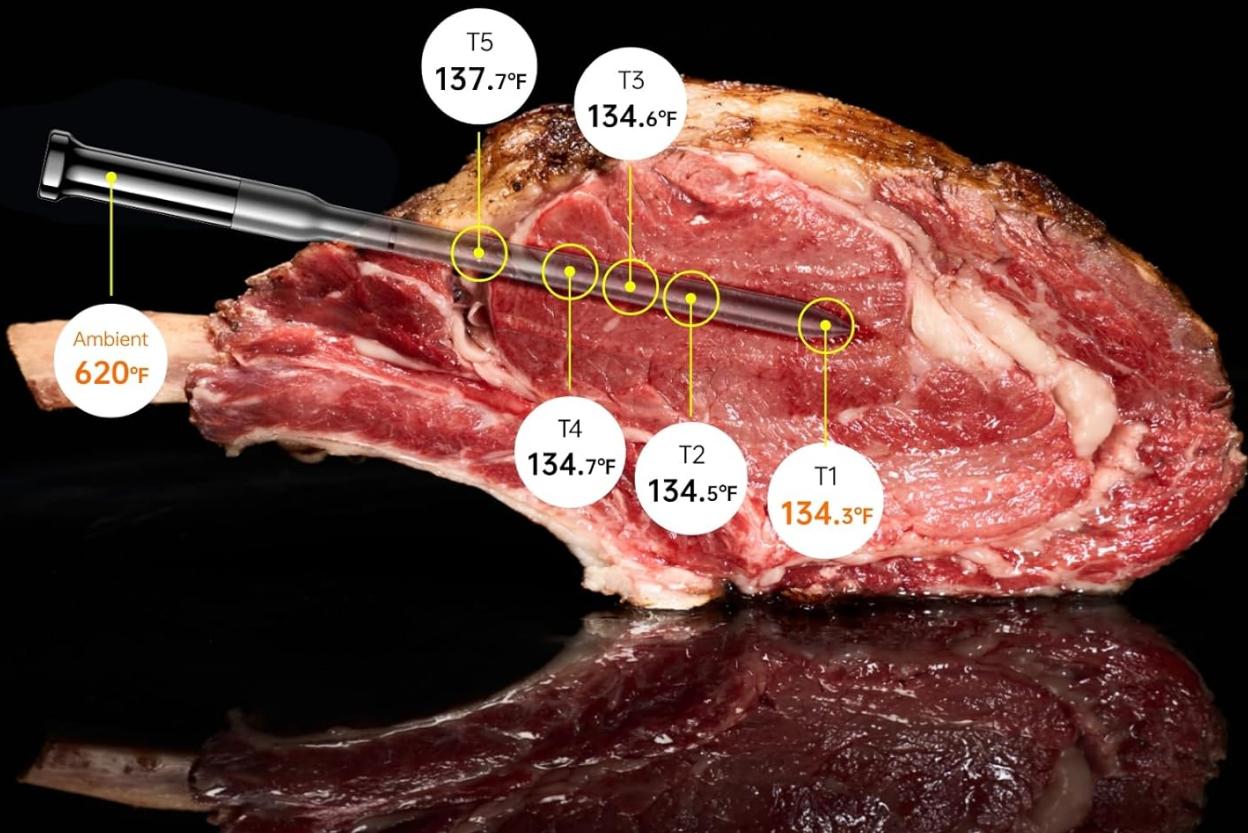

Image: A meat probe inserted into a roast, highlighting the positions of its six internal sensors and one ambient sensor for comprehensive temperature monitoring.

4.2 Setting Up a Cook

You can set up a cook directly from the Sync Gold Device Base or through the Typhur app.

Using the Device Base:

- Select Probe:** On the device base display, use the navigation buttons to select the probe you wish to configure.
- Set Target Temperature:** Follow the on-screen prompts to set your desired target internal temperature. The device may offer preset options for different types of meat and doneness levels.
- Start Cook:** Confirm your settings to begin monitoring. The display will show real-time internal and ambient temperatures.

Using the Typhur App:

- Open App:** Launch the Typhur app on your smartphone.
- Select Device:** Choose your Sync Gold device from the list of connected devices.

- Configure Cook:** Select the probe, meat type, desired doneness, and target temperature. The app provides a wide range of customizable options and cooking guides.
- Monitor Progress:** The app will display real-time temperature graphs, estimated cooking times, and send notifications when your food is nearing or has reached its target temperature.

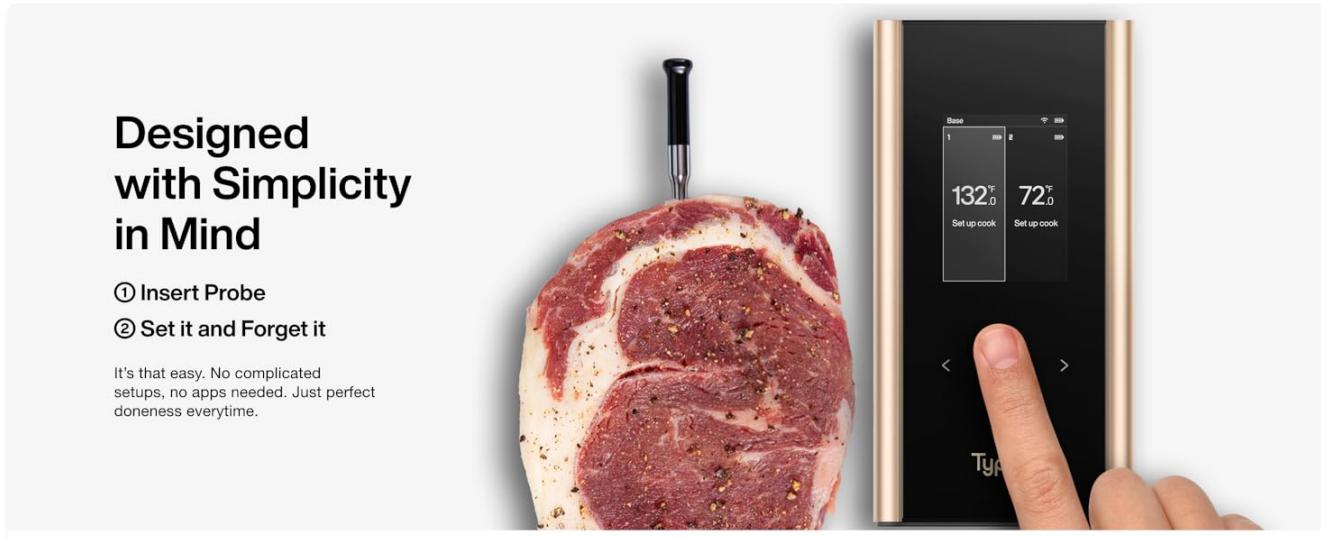

Image: A visual representation of inserting a probe into meat and interacting with the Sync Gold base to initiate a cooking session, emphasizing ease of use.

4.3 Signal Strength and Range

The Sync Gold utilizes Sub-1 GHz technology for robust probe-to-base communication, offering a signal strength significantly stronger than traditional Bluetooth. This allows for reliable monitoring through various barriers such as oven doors, grill lids, and even walls.

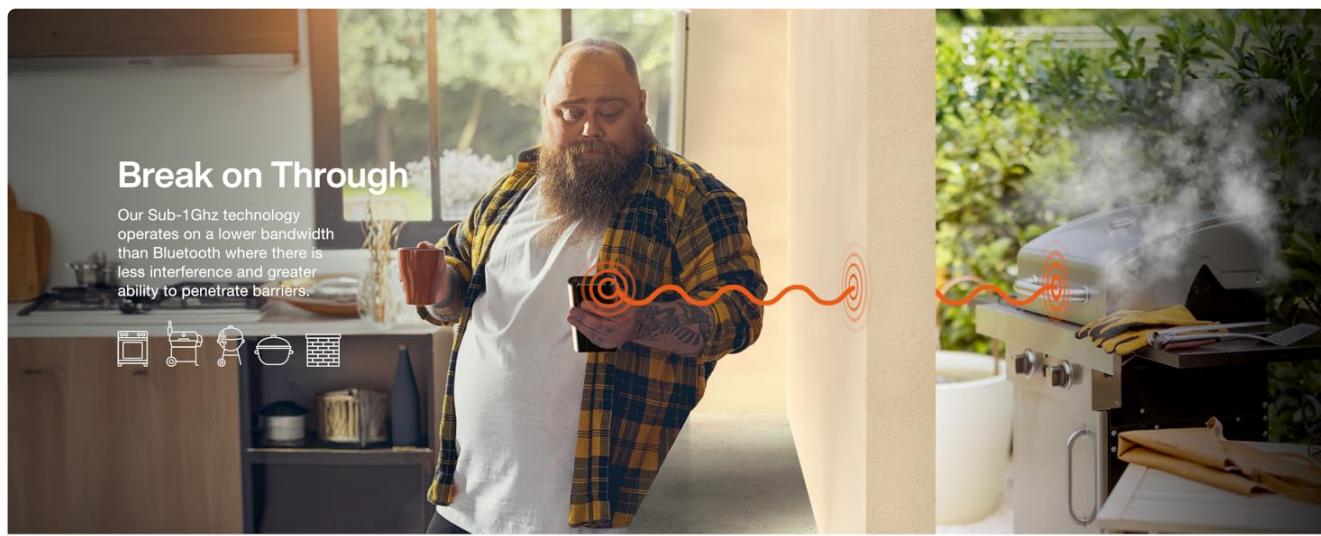

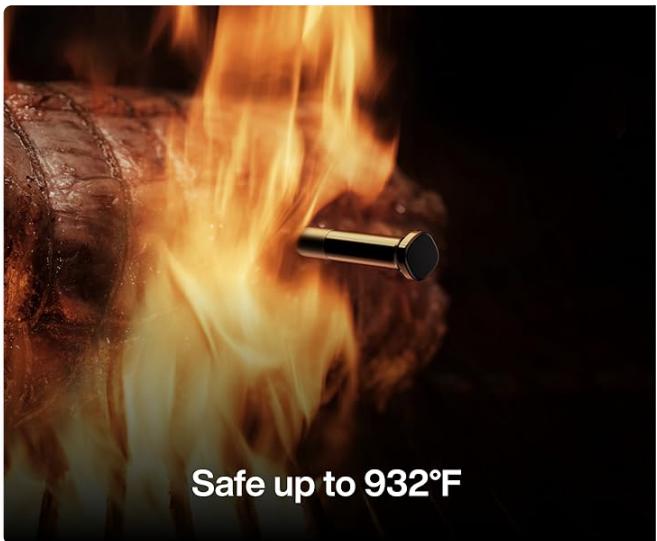

Image: An illustration demonstrating the Sub-1 GHz technology's ability to penetrate walls, allowing a user to monitor their grill from inside their home.

4.4 Receiving Alerts

The Sync Gold Device Base will provide audible and visual alerts when your target temperature is reached. If connected to the Typhur app, you will receive push notifications on your smartphone and smartwatch, allowing you to monitor your cook remotely.

Safe up to 932°F

Receive Alerts

Image: A split image showing a probe safely enduring high heat (up to 932°F) on one side, and a smartphone and smartwatch displaying cooking alerts on the other, emphasizing durability and remote monitoring.

5. MAINTENANCE AND CARE

5.1 Cleaning the Probes

The meat probes are IPX8 waterproof and designed for easy cleaning. They are dishwasher safe. For manual cleaning, wash the probes with warm, soapy water and a soft sponge. Rinse thoroughly and dry completely before storing.

5.2 Cleaning the Device Base

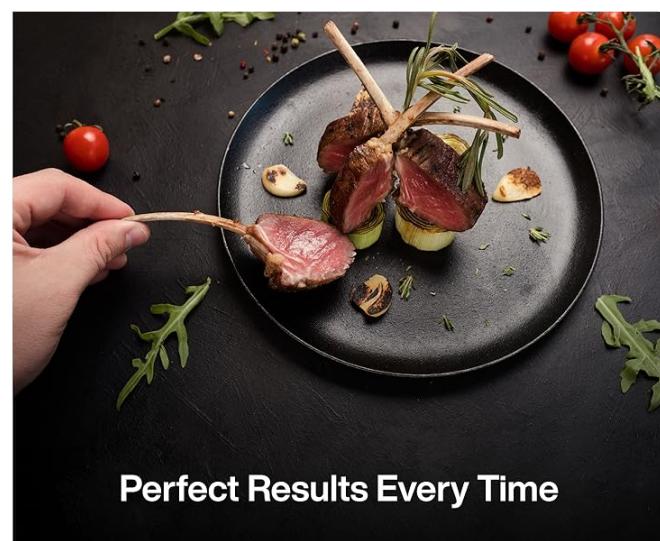

The Sync Gold Device Base is not waterproof. Wipe the base clean with a soft, damp cloth. Do not submerge the base in water or use abrasive cleaners.

5.3 Storage

Store the probes in the charging slots of the device base when not in use to ensure they are always charged and ready. Store the entire unit in a cool, dry place.

Dishwasher Safe

Perfect Results Every Time

Image: A split image showing a hand cleaning a probe under water, indicating its dishwasher-safe design, and a plate of perfectly cooked lamb chops, representing the desired cooking outcome.

6. TROUBLESHOOTING

Issue	Possible Cause	Solution
No display on device base	Low battery or no power.	Ensure 3 C batteries are correctly installed. Connect the device base to a power source using the charging cable.
Probes not connecting to base	Probes out of range, low probe battery, or interference.	Ensure probes are within range of the base. Place probes in the base to charge. Minimize physical obstructions between probes and base.
App not connecting to device base	Wi-Fi issue, app not paired, or app permissions.	Check your home Wi-Fi connection. Ensure the device base is connected to Wi-Fi. Re-pair the device in the app. Check app permissions on your smartphone.
Inaccurate temperature readings	Probe not inserted correctly, probe damage, or calibration issue.	Ensure the probe is inserted into the thickest part of the meat, avoiding bones, with all internal sensors covered. If issues persist, contact customer support.

7. SPECIFICATIONS

Model Number: WT05

Connectivity: Bluetooth, Sub-1G, Wi-Fi

Probe Sensors: 5 internal sensors + 1 ambient tip sensor per probe

Accuracy: $\pm 0.5^{\circ}\text{F}$

Response Time: 0.5 seconds

Max Heat Resistance (Probes): Up to 932°F (500°C)

Water Resistance (Probes): IPX8 (Dishwasher Safe)

Display Type: Digital

Power Source: 3 C batteries (included)

Included Components: Typhur Sync Device Base x 1, Meat Probe x 2, Charging Cable x 1, User Manual x 1

Certifications: CE, FCC, NIST, RoHS

8. WARRANTY AND SUPPORT

Typhur products are designed for durability and performance. For information regarding warranty coverage, please refer to the warranty card included with your product or visit the official Typhur website.

For technical support, troubleshooting assistance, or any questions about your Typhur Sync Gold Wireless WiFi Meat Thermometer, please contact Typhur Customer Service:

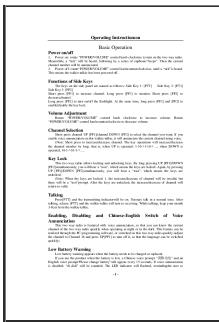

Website: www.typhur.com

Email: support@typhur.com

Please have your model number (WT05) and purchase date ready when contacting support.

To whom it may concern,

This application for change of identification request a new FCC ID and IC ID as stipulated in 47 CFR 2.833 (b) and 47 CFR 15.210 for presently authorized equipment.

This application by **Shenzhen Auros Technology Innovation Co., Ltd.** will establish a new FCC ID: 2BC6K-WTP3000, a new IC: 31431-WTP3000, PMN: WT01, HVIN: WT02 for the purpose of marketing.

The original grant to **Typhur Inc.**
FCC ID: 2BEFM-WTP3000, granted on 2024-09-12.
IC: 31884-WTP3000, PMN: WT04, WT05, WT07, WT09, HVIN: WT04, WT05, WT07, WT09, WT10, granted on 2024-07-29 will remain in effect.

Per 47 CFR 2.833(b)(5)(ii):
1. The original identification is FCC ID: 2BEFM-WTP3000 and IC: 31884-WTP3000.
2. The original grant date is 2024-07-29 for FCC ID and date is 2024-09-12 for IC ID.
3. The equipment is essentially identical. Only the trade name, FCC ID and IC ID number are different.
4. The original test report continues to be representative of and applicable to the equipment during the change of identification.
5. Other or photographs are included in this application.

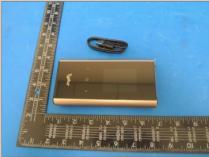

The following files are electronically submitted as attachments:
