## 5. MAINTENANCE

---

Proper care and maintenance will extend the life and appearance of your iPormis bed frame.

- **Cleaning Upholstery:** For general cleaning, gently vacuum the upholstered headboard and frame to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product instructions, testing on an inconspicuous area first.
- **Cleaning Frame:** Wipe metal and wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as necessary to maintain stability and prevent squeaking.
- **Drawer Care:** Keep the drawer tracks free of debris to ensure smooth operation.

## 6. TROUBLESHOOTING

---

If you encounter any issues with your bed frame, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose connections or improperly seated slats.	Ensure all bolts are tightened. Check that all wood slats are fully inserted into their plastic caps and seated correctly in the frame.
Drawers do not close or stay closed properly.	Drawers are not aligned, or the latch system is not engaged.	Ensure drawers are pushed in completely. The latch system is designed to fit perfectly with the drawers; push firmly to engage the latch and keep them closed. On hard floors, drawers may slide more easily if not latched.
Electrical outlets/USB ports are not working or buzzing.	Power cord not plugged in, or device incompatibility.	Verify the bed frame's power cord is securely plugged into a functioning wall outlet. If buzzing occurs, particularly with newer iPhone models (iPhone 12 or later), it may indicate an electrical incompatibility. Discontinue use of the charging ports for such devices and consider an alternative charging method.
Mattress does not fit perfectly (small gap at head or foot).	Standard mattress size variations.	This can occur due to slight variations in mattress manufacturing. A triangular pillow or bolster can be used to fill any small gaps at the headboard or footboard.

If the problem persists after attempting these solutions, please contact iPormis customer support for further assistance.
