- **Safety:** Do not disassemble, puncture, or modify the power bank. Keep it away from children and pets.

6. TROUBLESHOOTING

- **Power Bank Not Charging:**
Ensure the charging cable is securely connected to both the power bank's input and the wall charger. Verify that the wall charger is functioning correctly and providing adequate power (a 25W PD charger is recommended for fastest recharge).
- **Device Not Charging from Power Bank:**
Check if the power bank has sufficient charge. Ensure the cable connecting your device to the power bank is securely plugged in and undamaged. Try a different cable or port.
- **Slow Charging:**
Confirm that your device supports fast charging protocols (PD/QC 4.0) and that you are using a compatible cable. Charging multiple devices simultaneously may reduce the charging speed for individual devices.
