4. SETUP & INSTALLATION

The Pureit Wave Prime Water Purifier is designed for wall-mount installation. Due to the complexity of plumbing and electrical connections, professional installation is highly recommended to ensure proper functioning and to maintain warranty validity.

Installation Steps (Overview):

1. **Site Selection:** Choose a suitable wall location near a water inlet and an electrical outlet, ensuring sufficient space for maintenance.
2. **Mounting:** Securely mount the purifier unit to the wall using the provided installation kit.
3. **Water Connection:** Connect the raw water inlet to the purifier. Ensure all connections are tight to prevent leaks.
4. **Drain Connection:** Connect the reject water pipe to a suitable drain.

- 5. **Electrical Connection:** Plug the power cord into a grounded electrical outlet.
- 6. **Initial Flush:** Before first use, flush the system as per the detailed instructions provided by the installation technician to remove any manufacturing residues.

Refer to the detailed installation guide provided with your product or contact Pureit customer service for professional installation assistance.

5. OPERATING INSTRUCTIONS

First Use:

- After installation, ensure the power supply is connected and the water inlet valve is open.
- Allow the purifier to fill its storage tank. This may take some time during the initial fill.
- Dispense and discard the first few liters of purified water to ensure the system is thoroughly flushed.

Daily Operation:

- The purifier will automatically start purifying water when the water level in the storage tank drops.
- To dispense water, simply open the tap located at the bottom of the unit.
- Monitor any indicator lights on the unit (if present) for operational status or alerts.

6. MAINTENANCE

Regular maintenance is crucial for the optimal performance and longevity of your Pureit Wave Prime water purifier.

Filter Replacement:

- The purifier features a 6000-liter filter life. The actual life may vary depending on the quality of the input water and usage.
- It is recommended to replace the filters as indicated by the service reminder or after approximately 6000 liters of purification.
- Contact authorized Pureit service personnel for filter replacement to ensure genuine parts and proper installation.

Cleaning:

- **Exterior:** Wipe the exterior of the purifier with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage Tank:** Periodically clean the storage tank. This should ideally be done by a service technician during routine maintenance.
- **Internal Sediment Filter:** The unit includes an internal sediment filter. Its maintenance or replacement will be handled during scheduled service visits.

7. TROUBLESHOOTING

If you encounter any issues with your Pureit Wave Prime, refer to the following common troubleshooting tips. For complex problems, contact Pureit customer service.

Problem	Possible Cause	Solution
