4. SETUP

4.1 Charging the Controller

Connect the provided USB-C charging cable to the controller and a suitable power source. The LED indicators will show charging status. Ensure the controller is fully charged before initial use for optimal performance.

4.2 Bluetooth Connection Guide

1. Ensure the controller is **not** charging when attempting to connect.
2. Observe the LED indicators. If the 4th LED is not flashing quickly (e.g., if LEDs 1, 2, 3 are flashing), the controller is not in the correct pairing mode.
3. To enter pairing mode: Press and hold the 'HOME' button to turn off the controller if it's on. Then, open Bluetooth settings on your mobile phone. Hold down the 'B' button first, then continue to hold down the 'HOME' button simultaneously. The 4th LED light on the controller will flash quickly, indicating it is ready for pairing.
4. On your phone's Bluetooth settings, search for the corresponding Bluetooth name:
 - For iOS: "Dualshock 4 Wireless Controller"
 - For Android: "Wireless Controller"

5. Select the appropriate name to connect.

4.3 Phone Installation

Gently stretch the controller to fit your phone. The controller is designed to securely hold phones between 10-17.5cm in length. The non-slip rubber pads ensure your phone remains stable during gameplay.

5. OPERATING INSTRUCTIONS

5.1 Basic Controls

Refer to the button layout on your controller for standard gaming inputs. The Hall effect joysticks provide smooth and accurate movement.

5.2 Adjusting TURBO Function

To activate or adjust the TURBO function, consult the specific instructions provided with your controller. Typically, this involves pressing a designated TURBO button along with a specific action button to set the rapid-fire rate (5, 12, or 20 shots/s).

5.3 LED Lighting Modes

The controller features customizable LED lighting. You can switch between Rainbow Mode and 6 Single Color Modes to personalize your gaming setup. Specific button combinations (e.g., TURBO+R3 for joystick LED, TURBO+L3 for ABXY LED) control these settings.

5.4 Cloud Gaming Tips

For an optimal cloud gaming experience, ensure you are connected to a high-speed and stable network. Cloud gaming requires a low-latency environment to minimize delays and enhance responsiveness.

6. MAINTENANCE

To ensure the longevity of your KICKDOT Wireless Phone Controller:

- Keep the controller clean by wiping it with a soft, dry cloth.
- Avoid exposing the controller to extreme temperatures, humidity, or direct sunlight.
- Do not attempt to disassemble the controller, as this may void the warranty.
- Store the controller in a safe place when not in use to prevent damage.

7. TROUBLESHOOTING

7.1 Resetting the Controller

If you encounter abnormal situations such as inability to connect, charging issues, or joystick offset, you can try resetting the controller. Locate the 'RESET' hole on the back of the controller and gently poke it with a needle or a thin, pointed object. After resetting, restart the controller to resolve most non-quality related problems.

7.2 Connection Issues

If the controller fails to connect, ensure it is not currently charging. Re-attempt the Bluetooth connection process as described in Section 4.2. Verify that your phone's Bluetooth is enabled and that you are selecting the correct device name.
