SETUP

1. **Unpack:** Carefully remove the flat iron from its packaging.
2. **Inspect:** Check the appliance and cord for any signs of damage. Do not use if damaged.
3. **Plug In:** Insert the polarized plug into a suitable electrical outlet. Ensure the plug fits fully.
4. **Power On:** Press and hold the power button (usually indicated by a universal power symbol) until the indicator lights illuminate.

OPERATING INSTRUCTIONS

1. Identifying Your Hair Texture

The T3 StyleMax features custom heat automation. To optimize performance, first identify your hair texture:

- **Fine Hair:** Can you barely feel and see the strand?
- **Medium Hair:** Can you easily feel the strand and does it glide smoothly through your fingers?
- **Coarse Hair:** Does the strand feel thick and textured as it runs through your fingers?

2. Selecting Heat Settings and Mode

1. **Power On:** Press and hold the power button until the lights illuminate.
2. **Select Hair Texture:** Use the dedicated hair texture button (indicated by three wavy lines) to cycle through fine, medium, or coarse settings. The device will auto-adjust heat based on this selection.
3. **Adjust Heat (Optional):** The device offers 9 heat settings. If further adjustment is desired, use the heat setting indicators (dots) to fine-tune the temperature.
4. **Activate Curl Mode (for Waving/Curling):** Tap the Curl Mode button (indicated by a spiral icon) to optimize temperature for creating waves and curls.

3. Styling Your Hair

Ensure hair is clean, dry, and detangled before styling. For best results, apply a heat protectant.

- **Section Hair:** Divide your hair into 1-2 inch sections. Secure unstyled hair with clips.
- **Straightening:** Clamp a section of hair between the plates near the roots. Glide the flat iron slowly and steadily from root to tip. Repeat if necessary, but the SinglePass technology is designed for efficiency.
- **Waving/Curling:** For waves, clamp a section of hair, rotate the iron 180 degrees, and glide slowly through the hair. For tighter curls, rotate the iron further or use smaller sections.

MAINTENANCE AND CARE

- **Cleaning:** Ensure the flat iron is unplugged and completely cool before cleaning. Wipe the ceramic plates and exterior with a soft, damp cloth. Do not use abrasive cleaners or immerse the appliance in water.
- **Storage:** Store the appliance in a cool, dry place. Do not wrap the cord around the appliance, as this can cause damage.
- **Cord Care:** Regularly inspect the cord for any damage. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent, or similarly qualified persons in order to avoid a hazard.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Appliance does not turn on.	Not properly plugged in or power outlet issue.	Ensure the plug is fully inserted into a working outlet. Check the circuit breaker.
Appliance not heating up.	Power button not held long enough or internal fault.	Press and hold the power button until lights illuminate. If issue persists, contact customer support.
Hair is snagging or pulling.	Hair is tangled or plates are not clean.	Ensure hair is thoroughly detangled before use. Clean plates as per maintenance instructions.
Hair not straightening/curling effectively.	Incorrect heat setting for hair type or too large sections.	Adjust heat setting according to hair texture. Use smaller sections (1-2 inches). Glide slowly.
