Harvia SP60E-SP80E

Harvia Spirit SPE Sauna Heater User Manual

Model: SP60E (6 kW)

Brand: Harvia

INTRODUCTION

The Harvia Spirit SPE Sauna Heater is designed to provide a modern, elegant, and efficient heating solution for your sauna. Its elegantly curved shape and natural, organic design are accentuated by the rounded sauna stones, ensuring quick heating to your preferred temperature. This manual provides essential information for the safe and effective use of your Harvia Spirit sauna heater.

SETUP AND INSTALLATION

Proper installation is crucial for the safe and optimal performance of your Harvia Spirit sauna heater. It is highly recommended to have a qualified electrician perform the electrical hookup.

Key Installation Steps:

1. **Mounting:** Securely attach the heater to the sauna wall according to the detailed instructions provided in the separate installation guide.
2. **Stone Placement:** Carefully place the included sauna stones into the heater's stone compartment. Ensure proper air circulation by not packing them too tightly. The design allows for ample surface area for steam generation.
3. **Electrical Connection:** Connect the heater to a 240V/1PH power supply. This step must be performed by a certified electrician to ensure compliance with local electrical codes and safety standards.

4. **Control Unit Setup:** Install and connect the Harvia Xenio control unit. This unit provides a modern interface for controlling the sauna's temperature and other functions.
5. **Wi-Fi Remote Control (Optional):** If using the Harvia Xenio Wi-Fi Remote Control, connect it to the Xenio control unit for remote operation. This feature allows you to turn on the sauna when you are away, ensuring it's ready upon your arrival.

OPERATING INSTRUCTIONS

Your Harvia Spirit sauna heater is designed for quick heating and ease of use. Follow these steps to operate your sauna:

- **Power On:** Ensure the main power supply to the sauna heater is active.
- **Setting Temperature:** Use the Harvia Xenio control unit to set your desired sauna temperature. The

heater heats up very quickly.

- **Generating Steam:** Once the stones are hot, you can generate steam by carefully pouring a small amount of water over the sauna stones using a ladle. The large surface area of the stones allows for efficient steam production.
- **Safety Feature:** The heater includes an integrated safety function that automatically shuts off power if an object (e.g., a towel) is placed on top of the heater, preventing overheating and potential fire hazards.
- **Remote Operation (with Wi-Fi):** If you have the Harvia Xenio Wi-Fi Remote Control, you can control the sauna remotely via a compatible application on your smartphone. This allows you to pre-heat your sauna before you arrive home.

MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your Harvia Spirit sauna heater.

- **Stone Inspection:** Periodically inspect the sauna stones for signs of crumbling or degradation. Replace any broken or worn-out stones to maintain optimal heat and steam production.
- **Cleaning:** Ensure the heater and its surroundings are kept clean. Avoid using abrasive cleaners on the heater's surfaces.
- **Electrical Check:** Have a qualified electrician inspect the electrical connections annually to ensure they remain secure and in good condition.
- **Ventilation:** Ensure proper ventilation in your sauna room to allow for efficient air circulation and heat distribution.

TROUBLESHOOTING

If you encounter issues with your Harvia Spirit sauna heater, refer to the following common troubleshooting

tips:

Problem	Possible Cause	Solution
Heater not turning on.	No power supply; safety feature activated; control unit issue.	Check circuit breaker. Ensure nothing is pressing down on the safety switch on top of the heater. Verify control unit connection. Consult an electrician if issues persist.
Sauna not heating sufficiently.	Incorrect temperature setting; insufficient heating time; worn-out stones.	Increase temperature setting on the Xenio control unit. Allow more time for heating. Inspect and replace sauna stones if necessary.
No steam or weak steam.	Stones not hot enough; insufficient water poured; stones packed too tightly.	Allow heater to reach full temperature. Pour water slowly and evenly. Rearrange stones for better air circulation.
Control unit not responding.	Loose connection; software issue.	Check all cable connections to the control unit. Refer to the Xenio control unit manual for specific troubleshooting steps or contact customer support.

For complex issues or if troubleshooting steps do not resolve the problem, please contact Harvia customer support or a qualified service technician.

SPECIFICATIONS

- **Model:** SP60E (6 kW) / SP80E (8 kW)
- **Power Supply:** 240V/1PH
- **Recommended Room Size (6kW):** 177-294 CU. FT.
- **Recommended Room Size (8kW):** 177-430 CU. FT.
- **Product Dimensions:** 13.1 x 15 x 29.5 inches
- **Item Weight:** 130 pounds
- **Included Components:** Sauna Heater, Sauna Stones, Harvia Xenio Control Unit, Harvia Xenio WiFi Remote Control
