2. SETUP

The RANVOO PureMatt Pro mattress cleaner is designed for immediate use without complex assembly. Simply unpack the device, connect it to a power outlet, and it is ready for operation. No installation or adjustments are required before first use.

3. OPERATING INSTRUCTIONS

The PureMatt Pro utilizes a combination of technologies for comprehensive cleaning:

- **35kPa Dual Suction:** Provides powerful suction to capture deep-seated debris, pet hair, and dust mites in a single pass.
- **6-in-1 Technology:** Combines strong suction, wide surface coverage, a dual-beating system (12.8K/min), UV-C light, ultrasonic vibration, and gentle heating to dislodge and remove microscopic particles.
- **AI Chip:** Automatically adjusts suction and tapping strength based on the fabric type (mattress, sofa, carpet, pillow) for optimized cleaning and fabric protection.

- **Smart Dust Mites Sensor:** Provides real-time feedback on the cleanliness of the surface, indicating areas with higher dust mite concentration.

To operate, simply press the power button. The device will automatically engage its cleaning functions. Guide the vacuum across the desired fabric surface, allowing the AI chip to adapt to the material. The smart sensor will help identify areas requiring more attention.

4. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your RANVOO PureMatt Pro.

- **Dust Cup:** The 400ml dust cup is designed for easy detachment, emptying, and rinsing. After multiple cleanings, detach the dust cup, empty its contents, and rinse it with water. Ensure it is completely dry before reattaching.
- **HEPA Filter:** The 6-stage HEPA filter is washable. For best performance, clean the filter by washing it with water approximately once a month. Allow it to air dry completely for at least 24 hours before reinstalling.
- **Brush Roll:** The dual brush roll can be removed for cleaning. Unlock the clips on the bottom of the unit, remove the brush roll, and clear any tangled hair or debris.
