Roinvou 2+64G

Roinvou Android Car Radio Stereo User Manual

For Mitsubishi Mirage 2012-2018 (Model 2+64G)

1. PRODUCT OVERVIEW

This manual provides instructions for the Roinvou Android Car Radio Stereo, model 2+64G, designed for Mitsubishi Mirage vehicles manufactured between 2012 and 2018 (Left-Hand Drive models). This unit features a 9-inch capacitive HD touchscreen, 5G WiFi connectivity, Bluetooth, GPS navigation, FM RDS radio, EQ settings, Mirror Link, DSP, and Steering Wheel Control compatibility.

2. VEHICLE COMPATIBILITY

This car radio stereo is compatible with Mitsubishi Mirage models from 2012 to 2018 (LHD). To confirm compatibility, compare your vehicle's dashboard with the provided images. If unsure, consult with a professional installer or the manufacturer.

4. SETUP AND INSTALLATION

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation.

4.1 General Installation Steps

1. Remove the original car radio unit from the dashboard.
2. Connect the power cable, RCA harness, and other necessary cables to the new Roinvou unit.
3. Install the GPS antenna in a location with a clear view of the sky.
4. Mount the AHD backup camera (if included) and route its cable to the main unit.
5. Secure the new car stereo unit into the dashboard opening.
6. Reconnect the vehicle's power and test all functions.

Image: General installation overview showing the process of replacing the factory radio with the new Android unit.

4.2 Backup Camera Connection

Connect the backup camera as shown in the diagram. The reverse input cable must be plugged in, even if the reverse camera is not actively used, to prevent interference with Bluetooth and Wi-Fi signal reception.

How to Connect the Backup Camera

5.2 GPS Navigation & WiFi Connectivity

The system comes pre-equipped with North American maps for offline navigation. For real-time traffic updates and access to online navigation applications, connect the unit to a Wi-Fi hotspot. You can download additional navigation apps from the Play Store.

Mirror Link for Android/iOS

Mirror Links for Android and iOS smartphones, you can synchronize the phone screen to enjoy playing video on a larger screen.

WiFi Connection

WiFi&USB Connection

➔ One-Way

↔ Two-Way

Image: GPS navigation display showing a route, along with icons for popular navigation and social media applications accessible via Wi-Fi.

5.3 Mirror Link

Mirror Link functionality allows you to synchronize your Android or iOS smartphone screen with the car stereo display. This enables viewing of phone content on the larger screen.

26 UI Themes

Equipped with 28 UI themes, multiple choices as you like, brings you a brilliant experience.

Image: Visual explanation of Mirror Link, showing how iOS (one-way) and Android (two-way) devices can cast their screens to the car stereo.

5.4 FM/RDS Radio & EQ Settings

The integrated FM/RDS radio allows access to local radio stations. The unit includes an equalizer (EQ) for sound customization, providing a high-fidelity audio experience.

5.5 Steering Wheel Control (SWC)

The unit supports integration with your vehicle's original steering wheel controls for safe operation while driving.

- **Without CANBUS Decoder:** Connect the steering wheel control wires (Key1, Key2) from the power cable to the corresponding wires of your original car. Then, navigate to "SteeringWheelKey" in the unit's settings to manually map and activate the buttons.
- **With CANBUS Decoder:** Connect the CANBUS decoder before powering on the machine. Access the settings (Settings > Factory Setup > Password 000000 > Can Settings) to configure SWC. Select the brand and model of the CANBUS decoder according to your vehicle's specifications.

Image: Detailed guide for setting up steering wheel controls, differentiating between systems with and without a CANBUS decoder.

6. KEY FEATURES

6.1 Powerful Processor

The unit is equipped with a built-in 4-core processor and 2GB RAM, providing efficient performance for various applications and functions. It includes 64GB of internal storage (ROM).

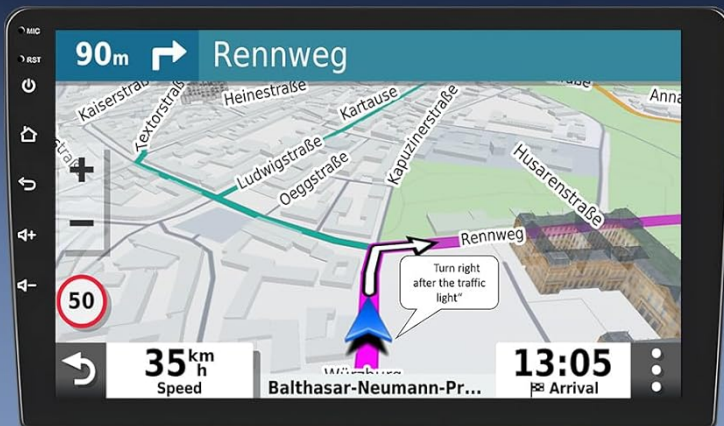

Image: Visual representation of the internal hardware specifications, highlighting the 4-core CPU, 2GB RAM, and 64GB ROM.

6.2 HD Touchscreen & UI Themes

The 9-inch capacitive HD touchscreen offers a resolution of 1024x600P, ensuring clear visibility even in direct sunlight. The unit features 26 customizable user interface (UI) themes.

GPS Navigation

Real-time road conditions help avoid traffic jams Accurate satellite positioning prevents you getting lost

WiFi Connection

High-speed internet access, application download, online video watching, Rich entertainment gets you out of a tiring drive

7. MAINTENANCE

To ensure optimal performance and longevity of your Roinvou car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for and install available software updates to improve functionality and security.
- **Temperature:** Avoid exposing the unit to extreme temperatures for extended periods.
- **Connections:** Ensure all cables and connections are secure to prevent intermittent issues.

8. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common troubleshooting steps:

- **No Power:** Check all power connections and the vehicle's fuse box. Ensure the ignition is on.
- **No Sound:** Verify speaker connections, volume settings, and audio source selection. Check if the mute function is active.

- **GPS Signal Loss:** Ensure the GPS antenna is properly installed and has a clear view of the sky. Check for obstructions.
- **Bluetooth/Wi-Fi Connectivity Issues:** Restart the car stereo and your mobile device. Ensure both devices are within range and discoverable. Check for any interference.
- **Backup Camera Not Displaying:** Confirm the camera is properly connected and powered. Ensure the reverse input cable is correctly wired and plugged into the main unit.
- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, a factory reset might be necessary (note: this will erase user data).

For persistent issues, contact customer support.
