4. MACHINE OVERVIEW

Familiarize yourself with the main components of your SINGER M1000 Mending Machine.

Image: This image highlights key features: the Easy Stitch Selection dial, a visual representation of 32 stitch applications, and the Reverse Lever for securing stitches.

- **Stitch Selection Dial:** Located on the front of the machine, used to choose desired stitch patterns.
- **Reverse Lever:** Engages reverse stitching to secure seams.
- **Top Drop-in Bobbin:** Provides easy access for bobbin insertion and monitoring thread supply.
- **Free Arm:** Accessible by removing the accessory compartment, ideal for sewing cuffs and hems.
- **LED Light:** Illuminates the sewing area for better visibility.

5. SETUP

5.1 Power Connection

Connect the power cord to the machine and then to a suitable electrical outlet. Ensure the foot pedal is also connected.

5.2 Winding the Bobbin

1. Place an empty Class 15 transparent bobbin onto the bobbin winder spindle.
2. Follow the threading guides for bobbin winding, typically indicated by dashed lines or numbers on the machine.
3. Engage the bobbin winder and press the foot pedal to start winding.
4. Stop when the bobbin is full and trim the thread.

5.3 Threading the Machine

Proper threading is crucial for correct stitch formation. Follow the numbered threading guides on the machine carefully.

Image: A detailed view of the machine's side, illustrating the clear, numbered threading guides to ensure correct upper thread path.

1. Raise the presser foot lifter.
2. Place a spool of thread on the spool pin.
3. Guide the thread through the upper threading path, following the numbered steps or arrows.
4. Thread the needle from front to back.
5. Insert the wound bobbin into the top drop-in bobbin case.
6. Pull the bobbin thread up through the needle plate opening.

Image: A close-up showing the transparent cover of the top drop-in bobbin, indicating easy access and visibility of the bobbin thread supply.

6. OPERATING INSTRUCTIONS

6.1 Stitch Selection

Turn the Stitch Selection Dial to choose one of the 32 available stitch applications. The machine automatically sets the optimal stitch width and length for the selected stitch.

- **Straight Stitch:** For basic seams and topstitching.
- **Zigzag Stitch:** For finishing raw edges, appliqué, and decorative purposes.
- **Multi-step Zigzag:** Suitable for elastic insertion and seam finishing.
- **Blind Hem Stitch:** For creating invisible hems.

6.2 Starting to Sew

1. Place your fabric under the presser foot.
2. Lower the presser foot.
3. Gently press the foot pedal to begin sewing. The machine operates at a single speed.

6.3 Using the Reverse Lever

To secure the beginning and end of a seam, press and hold the Reverse Lever while sewing. Release the lever to continue sewing forward.

6.4 Free Arm Sewing

Remove the accessory compartment to expose the free arm. This feature is useful for sewing small, tubular items such as cuffs, pant hems, and necklines.

6.5 Adjustable Thread Tension

The machine's tension control allows you to adjust the balance between the upper and bobbin threads. Proper tension ensures a smooth, even stitch. Adjust as needed based on fabric type and thread thickness.

7. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your sewing machine.

- **Cleaning:** Periodically clean lint and dust from the bobbin area and feed dogs using a small brush. Always unplug the machine before cleaning.
- **Needle Replacement:** Replace needles regularly, especially if they become bent or dull, to prevent skipped stitches and fabric damage.
- **Bobbin Type:** Use only SINGER Class 15 Transparent bobbins for best results.

8. TROUBLESHOOTING

This section addresses common issues you might encounter. For more complex problems, refer to the official SINGER support resources.

Problem	Possible Cause	Solution
Skipped Stitches	Incorrectly threaded needle, bent needle, wrong needle size for fabric.	Re-thread the machine, replace the needle, use appropriate needle for fabric type.
Thread Breaking	Incorrect tension, poor quality thread, improperly wound bobbin, burr on needle plate.	Adjust tension, use good quality thread, re-wind bobbin, check for burrs.
Fabric Not Feeding	Presser foot not lowered, feed dogs clogged with lint.	Lower presser foot, clean feed dogs.
Machine Runs Slowly / Stops	Overload (too thick fabric), motor issue, internal jam.	Ensure fabric is suitable for the machine (light to medium weight). If problem persists, contact support.

1 STRAIGHT STITCH	Seams	The most common use for the straight stitch is for joining fabrics together with a seam. The machine needle plate has a series of etched markings to the right of the presser foot which serve as guidelines for various widths of seam allowances when sewing with the needle in center position. Line up the raw edges of the fabric with the desired seam allowance guideline to sew a seam.
2 STRAIGHT STITCH	Quilt Piecing	Quilt piecing is done using a 1/4" seam allowance. After sewing, press seams toward the darker of the two fabrics, to help prevent the seam allowance from being visible on the top side of the quilt. It may be helpful to use a Quarter Inch Foot (additional accessory for some machine models).
3 STRAIGHT STITCH	Topstitching	Topstitching is a line of straight stitching on the outside of a garment or project, usually as a decorative embellishment. Set the machine for straight stitch, with a stitch length of 3 to 3.5mm. Sew 1/4" - 3/8" from the edge of the fabric. If sewing with topstitching thread, use a SINGER Topstitching Needle, size 90/14 for medium weight fabrics, or a SINGER Topstitching needle, size 100/16 for heavier fabrics. A Topstitching Needle (additional accessory) has a longer eye to accommodate thicker threads, such as topstitching thread which gives the stitches a bolder look.
4 STRAIGHT STITCH	Edge Stitching	Edgestitching can be used to add stability to projects like tote bags, or it can be used simply as a decorative embellishment. Set the machine for straight stitch. Sew approximately 1/8" from the edge of the fabric.
5 STRAIGHT STITCH	Decorative Stitching	The basic straight stitch can be used to embellish fabrics. Experiment with various thread types to create your own unique design. It can be helpful to draw stitch guidelines on the fabric with a removable fabric marking tool, but make sure to use a fabric marker that is appropriate for the type of fabric being sewn.
6 STRAIGHT STITCH	Attaching Trims	Attach ribbons and trims to embellish fabrics. To attach ribbons or trim, set the machine for straight stitch. When stitching wider trims or those that tend to shift on top of the fabric while sewing, it can be helpful to use a fusible basing tape to hold it in
