wavytalk B390

Wavytalk Pro Steam Hair Straightener Brush User Manual

Model: B390 | Brand: wavytalk

1. PRODUCT OVERVIEW

The Wavytalk Pro Steam Hair Straightener Brush, also known as the Steamline Pro, is a versatile 3-in-1 styling tool designed to straighten, comb, and provide steam hair care. It aims to reduce damage, nourish hair, and expedite the straightening process, offering a smooth and lustrous finish.

Key Features:

- **3-in-1 Functionality:** Combines a hair straightener, comb, and hair steam care for efficient styling.
- **Hydro-Infusion Technology:** Utilizes advanced ultrasound and circular heating to convert water molecules into evenly heated vapor, nourishing hair and preventing frizz.
- **Fast Heating:** Reaches optimal temperature in approximately 30 seconds.
- **Anti-Scald Coverage:** Equipped with a full anti-scald shell and deep wave tip design to reduce burn risk and enhance hair grip.
- **Adjustable Temperature:** Features 4 temperature settings to suit various hair types.
- **Safety Features:** Includes a 30-minute automatic shut-off function.
- **Universal Voltage:** Compatible with 100-240V for worldwide use.

2. SAFETY INFORMATION

This product is equipped with a US plug (polarized). Before using the steam hair straightener brush, carefully read and understand the user manual provided. Do not leave the device unattended while in use.

- Always ensure your hands are dry before plugging in or unplugging the device.

- Keep the device away from water or damp environments. Do not use near bathtubs, showers, basins, or other vessels containing water.
- Do not immerse the device in water or any other liquid.
- Unplug the device immediately after use and before cleaning.
- Keep out of reach of children.
- Do not use if the cord or plug is damaged. Contact customer support for assistance.
- Use the heat-resistant glove provided for secure handling during use.

3. SETUP

Filling the Water Tank:

1. Pinch the buttons on the side of the water tank and pull it out to remove.
2. Remove the rubber stopper from the tank.
3. Using the provided dropper bottle, fill the tank with purified or distilled water. Avoid using tap water to prevent mineral buildup and blockages.
4. Replace the rubber stopper firmly.
5. Reinsert the tank into the device until it clicks securely into place.

Image 2: Water Tank Filling Instructions

Initial Power-On:

1. Plug the device into a suitable power outlet (100-240V).
2. Press and hold the power button until the indicator lights illuminate.
3. The device will begin to heat up. The indicator lights will blink until the selected temperature is reached, then they will remain solid.

4. OPERATING INSTRUCTIONS

Temperature Settings:

The Wavytalk Pro Steam Hair Straightener Brush offers 4 temperature settings to cater to different hair types. Select the appropriate temperature for your hair to achieve optimal results and minimize heat exposure.

- **320°F (150°C):** Ideal for thin hair.
- **350°F (170°C):** Suitable for medium hair.
- **380°F (190°C):** Recommended for wavy/curly hair.

- 410°F (210°C): Best for coily hair.

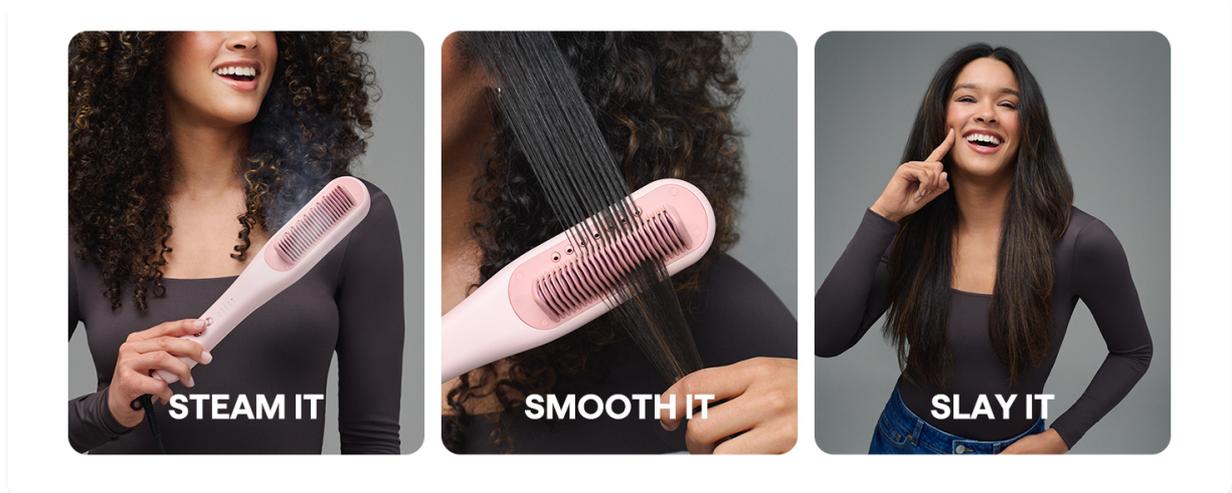

Image 3: Recommended Temperature Settings

How to Use:

1. Ensure your hair is dry and detangled.
2. Divide your hair into sections using clips or hair ties.
3. Put on the heat-resistant glove for added protection.
4. Take a small section of hair and place it between the bristles of the brush.
5. Glide the straightening comb slowly and steadily through your sectioned hair, ensuring uniform contact with each strand from root to tip.
6. Repeat until the desired straightness is achieved. The steam will be emitted intermittently to hydrate and smooth your hair.

5. MAINTENANCE

Cleaning the Water Tank:

- After each use, ensure the device is unplugged and cooled down.

- Remove any remaining water from the tank to prevent stagnation and mineral buildup.
- Clean the tank with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.

General Care:

- Wipe the exterior of the brush with a soft, damp cloth.
- Ensure the bristles are free from hair product residue.
- Store the device in a cool, dry place, away from direct sunlight and moisture.
- Do not wrap the power cord around the device, as this can damage the cord.

6. TROUBLESHOOTING

Common Issues:

- **Device not turning on:** Ensure the device is properly plugged into a working power outlet. Check if the power button is pressed and held for a few seconds.
- **No steam being emitted:** Check if the water tank is filled with water and correctly inserted. Ensure the steam function is activated (refer to operating instructions).
- **Device not heating up:** Verify that the power is on and the desired temperature setting is selected. Allow sufficient time (approx. 30 seconds) for the device to reach temperature.
- **Hair not straightening effectively:** Ensure hair is dry and detangled. Take smaller sections of hair and glide the brush slowly. Adjust the temperature setting according to your hair type.
- **Steam visibility is low:** The Hydro-Infusion technology disperses steam as a mist-like vapor at 0.5ml/min intermittently, so its visibility may be relatively low. This is normal operation.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	12.09 x 2.17 x 2.17 inches
Item Model Number	B390
Weight	2.45 Pounds
Brand	wavytalk
