2. SETUP INSTRUCTIONS

Package Contents:

- XunFox K90 RGB Gaming Keyboard
- USB Cable (Type-C to USB-A)

Connecting the Keyboard:

1. Locate the USB Type-C port on the back or side of the XunFox K90 keyboard.
2. Connect the Type-C end of the provided USB cable to the keyboard's port.
3. Connect the USB-A end of the cable to an available USB port on your computer or laptop.
4. The keyboard will automatically be recognized by your operating system (e.g., Windows 10). No additional drivers are typically required.

3. OPERATING INSTRUCTIONS

Basic Operation:

The XunFox K90 keyboard functions as a standard 66-key input device. Simply plug it into your computer, and it will be ready for use.

RGB Backlight Control:

The keyboard features adjustable RGB backlighting with multiple effects. Use the **FN** (Function) key in combination with specific keys to control the lighting.

- **FN + LED Key (usually next to F12):** Cycles through various lighting modes, including endless stream, colorful horse running, circular breathing, solid comet tailing, monochrome, multicolor diffusion, and backlight color impact diffusion.
- **FN + ↑ (Up Arrow):** Increases backlight brightness.
- **FN + ↓ (Down Arrow):** Decreases backlight brightness.
- **FN + → (Right Arrow):** Increases the speed of the lighting effect.
- **FN + ← (Left Arrow):** Decreases the speed of the lighting effect.

RGB LIGHT

COLORFUL COOL LIGHT EFFECT, MULTIPLE MODES

FN + LED key can adjust various lighting effects
At the same time, it also supports the speed of light, light and dark adjustment

Light mode switching

Endless stream / colorful horse running / colorful circular breathing / solid comet tailing
Monochrome / multicolor diffusion shrinkage / backlight color impact diffusion

Light intensity adjustment

FN + "↑" brightness increases
FN + "↓" brightness reduction

Light efficiency speed regulation

FN + "→" / FN + "←" control adjustment,
FN + "←" slows down and FN + "→" speeds up

Figure 4: Diagram illustrating the key combinations for controlling RGB lighting modes, intensity, and speed on the XunFox K90 keyboard.

4. MAINTENANCE

Cleaning the Keyboard:

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the keycaps and surface.
- Avoid spraying liquids directly onto the keyboard.
- For dust and debris between keys, use compressed air.
- Do not use harsh chemicals or abrasive materials, as they may damage the finish.

Storage:

- Store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures.
- If storing for an extended period, consider using the original packaging or a protective cover to prevent dust accumulation.

5. TROUBLESHOOTING

Keyboard Not Responding:

- **Check USB Connection:** Ensure the USB cable is securely connected to both the keyboard and the computer. Try a different USB port.
- **Restart Computer:** Sometimes a simple system restart can resolve connectivity issues.
- **Test on Another Computer:** If possible, test the keyboard on a different computer to determine if the issue is with the keyboard or the original computer's setup.

RGB Lights Not Working or Incorrect:

- **Check FN Key Combinations:** Refer to the "RGB Backlight Control" section (Section 3) to ensure you are using the correct key combinations to adjust lighting modes, brightness, and speed.
- **Reconnect Keyboard:** Disconnect and reconnect the USB cable.
