## SETUP AND ASSEMBLY

The Scorpion Gaming Cockpit is delivered partially assembled. Professional installation is recommended due to its size and complexity. Ensure you have adequate space and assistance during setup.

### Initial Placement

1. Unpack all components carefully.
2. Place the main chassis in your desired location, ensuring sufficient clearance around the unit for adjustments and entry/exit. Refer to Figure 6 for entry door dimension requirements.

### Monitor Installation

1. Attach your monitors to the adjustable screen bracket. The cockpit supports various configurations (single 43-inch, 49-inch ultrawide, or up to three 32-inch monitors, expandable to five 27-inch monitors).
2. Ensure monitors are securely fastened to prevent accidental detachment.
3. Connect your PC or console to the monitors and the cockpit's built-in inputs/outputs.

### Power Connection

1. Connect the cockpit to a standard power outlet using the provided power cable.
2. Ensure the power source meets the product's electrical requirements.

## OPERATING INSTRUCTIONS

---

The Scorpion Gaming Cockpit features intuitive electronic controls for various adjustments. Familiarize yourself with the control panel before use.

### Electronic Adjustments

1. **Swing Arm Lift/Lower:** Use the designated buttons on the control panel to electronically adjust the height of the monitor swing arm.
2. **Cockpit Zero Gravity:** The overall cockpit can be adjusted to a zero-gravity position for enhanced comfort. Use the corresponding control buttons to recline the entire structure.
3. **Seat Back Adjustment:** Electronically adjust the recline angle of the seat back for personalized comfort.
4. **Monitor Distance/Height:** The height and distance of the monitor array can be adjusted manually or electronically depending on the specific model version.

### Keyboard Tray and Armrests

1. The armrest and keyboard tray can be manually opened and closed. Gently pull or push them into position as needed for entry/exit or use.
2. The oversized keyboard tray (90x40 cm) provides ample space for your keyboard, mouse, and other peripherals.

### RGB Lighting

1. The cockpit features adjustable 16-color RGB light strips. Refer to the specific lighting control interface (usually integrated into the main control panel) to change colors and effects.

## MAINTENANCE

---

Proper maintenance ensures the longevity and optimal performance of your Scorpion Gaming Cockpit.

### Cleaning

- **Product Care Instructions:** Wipe Clean.
- Use a soft, damp cloth to clean the PU leather surfaces. Avoid harsh chemicals or abrasive cleaners.
- For the steel structure, use a dry or slightly damp cloth.
- Regularly dust all surfaces, especially around electronic components and moving parts.

### Inspection

- Periodically check all bolts and fasteners to ensure they are tight.
- Inspect electrical cables for any signs of wear or damage.
- Ensure moving parts operate smoothly without obstruction.

## TROUBLESHOOTING

---

This section addresses common issues you might encounter with your Scorpion Gaming Cockpit.

## Power Issues

- **No Power:** Ensure the power cable is securely plugged into both the cockpit and the wall outlet. Check if the outlet is functional.
- **Intermittent Power:** Verify all connections are stable. Avoid overloading the circuit.

## Adjustment Malfunctions

- **Electronic Adjustments Not Working:** Check power supply. Ensure no obstructions are blocking the moving parts. If the issue persists, contact customer support.
- **Stiff Manual Adjustments:** Ensure no debris is caught in the mechanisms. Apply a small amount of silicone lubricant if necessary (avoiding electrical components).

## Monitor Display Issues

- **No Signal:** Verify all video cables (HDMI, DisplayPort, etc.) are securely connected between your PC/console and the monitors. Check monitor input settings.
