FHI Heat Innovator Pro Power Speed Professional Hair Dryer User Manual

Model: IN2003

INTRODUCTION

Thank you for choosing the FHI Heat Innovator Pro Power Speed Professional Hair Dryer. This manual provides essential information for the safe and effective operation, maintenance, and care of your new hair dryer. Please read it thoroughly before first use and retain it for future reference.

The FHI Heat Pro Power Speed Dryer is a lightweight hair dryer that's fast and powerful, featuring advanced ionic technology, multiple heat and speed settings, and an ergonomic design for comfortable use.

KEY FEATURES

- **Advanced Ionic Technology:** Designed to enhance shine, reduce frizz and heat damage, instantly smooth hair, and promote healthier-looking hair.
- **Multiple Settings:** Features 3 temperature settings and 3 speed settings, indicated by LED lights, for versatile styling control.
- **Cool Shot Button:** Helps to set your hairstyle for a longer-lasting finish.
- **Lightweight & Ergonomic Design:** Provides comfortable handling during use.
- **Overheat Protection:** Built-in safety feature to prevent overheating and reduce fire hazards.
- **Auto Cleaning System:** Equipped with a micro filter to prevent lint and dirt build-up, extending the life of the dryer. A replacement filter is included.
- **Professional-Grade Performance:** Operates at 1700W/125V with a Brushless BLDC Digital Motor, reaching a motor speed of 110,000 RPM.
- **Included Styling Tools:** Comes with a Speed Dry Nozzle for faster drying, a Smooth Dry Narrow Nozzle for a polished finish and shine, and a Curl Defining Diffuser to minimize frizz and enhance volume.

TROUBLESHOOTING

- **Dryer Not Turning On:** If the hair dryer does not power on, ensure the plug is fully inserted into the electrical outlet. Check the reset buttons on the wall part of the plug and press them if they have tripped.
- **Reduced Airflow or Performance:** This may indicate a clogged filter. Refer to the Maintenance section for instructions on cleaning or replacing the micro filter.
- **Unusual Odor:** A slight burning smell during initial use is normal and typically dissipates after a few uses, as manufacturing oils burn off. If the smell persists or is strong, discontinue use and contact customer support.
- **Attachments Not Staying On:** Ensure the attachments are properly aligned and snapped firmly into place.
