Hanes O4200

Hanes Men's X-Temp Performance T-Shirt Pack Instruction Manual

1. PRODUCT OVERVIEW

The Hanes Men's X-Temp Performance T-Shirt Pack offers a blend of cotton and polyester designed for comfort and performance. These crewneck t-shirts incorporate X-Temp technology to assist in keeping the wearer cool and dry by wicking moisture away from the skin. The fabric is ring-spun for softness, and the construction includes double-needle stitching, a lay-flat ribbed crewneck, and shoulder-to-shoulder taping for durability.

Image 1.1: Two Hanes X-Temp Performance T-Shirts in black. These shirts are designed for comfort and moisture management.

Key Features:

- **X-Temp Technology:** Engineered to adapt to body temperature, helping to keep you cool and dry.
- **Moisture-Wicking Fabric:** Actively moves sweat away from the skin for enhanced comfort.
- **Cotton-Rich Blend:** Provides softness and breathability.
- **Durable Construction:** Features double-needle stitching and shoulder-to-shoulder taping.
- **Lay-Flat Collar:** Ribbed crewneck designed to maintain its shape.

2. INITIAL USE AND SETUP

Before wearing your new Hanes X-Temp Performance T-Shirts for the first time, it is recommended to wash them according to the care instructions provided. This helps to remove any manufacturing residues and ensures optimal comfort and fit from the initial wear.

Washing Before First Wear:

1. Machine wash in cold water with similar colors.
2. Use non-chlorine bleach only when needed.
3. Tumble dry low.

4. Do not iron.

3. OPERATING (WEARING) INSTRUCTIONS

These t-shirts are designed for everyday wear, active use, or as an undershirt. The X-Temp technology works continuously to regulate your body temperature, making them suitable for various activities and climates.

Image 3.1: A man demonstrating the fit and style of the Hanes X-Temp Performance T-Shirt.

Optimal Use:

- Wear as a standalone top for casual comfort.
- Layer under other garments for added warmth or as a base layer during physical activity.
- The moisture-wicking properties are most effective when the shirt is in direct contact with the skin.

4. MAINTENANCE AND CARE

Proper care extends the life and performance of your Hanes X-Temp T-Shirts. Always refer to the care label inside the garment for specific instructions.

Washing Instructions:

- **Machine Wash:** Use cold water to help preserve fabric integrity and color.
- **Bleach:** Only use non-chlorine bleach when necessary. Chlorine bleach can damage the fabric and affect its moisture-wicking properties.
- **Drying:** Tumble dry on a low heat setting. High heat can cause shrinking and damage the fabric blend.
- **Ironing:** Do not iron. The fabric blend is designed to be wrinkle-resistant, and direct heat from an iron can damage the material.

5. TROUBLESHOOTING

This section addresses common concerns regarding the Hanes X-Temp Performance T-Shirts.

Common Issues and Solutions:

- **Shrinking After Wash:**

Issue: The t-shirt appears to have shrunk after washing.

Solution: Ensure you are washing in cold water and tumble drying on a low heat setting. High heat is a common cause of fabric shrinkage. While some minimal shrinkage may occur with cotton blends, following care instructions minimizes this.

- **Loss of Shape/Stretching:**

Issue: The collar or body of the shirt loses its original shape.

Solution: The shirts are designed with a lay-flat collar and durable construction. Avoid excessive stretching when putting on or taking off the shirt. Adhering to the recommended washing and drying temperatures also helps maintain fabric elasticity.

- **Reduced Moisture-Wicking Performance:**

Issue: The shirt does not seem to wick moisture as effectively.

Solution: Avoid using fabric softeners, as they can coat the fibers and reduce the fabric's ability to wick moisture. Ensure the shirt is clean and free from residue.

- **Fit Issues:**

Issue: The shirt does not fit as expected.

Solution: Refer to the size guide in the Specifications section to ensure the correct size was selected. If the issue persists, consider exchanging for a different size.

6. SPECIFICATIONS

Detailed information about the Hanes Men's X-Temp Performance T-Shirt Pack (Model O4200).

Attribute	Detail
Model Number	O4200
Department	Men's
Fabric Type	60% Cotton, 40% Polyester; Light Steel: 90% Cotton, 10% Polyester
