Print-Then-Cut Feature

The Cricut Joy Xtra supports the Print-Then-Cut feature, allowing you to create full-color designs like stickers. Simply print your design on your inkjet printer, then load the printed material into your Cricut Joy Xtra for precise cutting.

Material Compatibility

The machine works with over 50 materials, including popular options like vinyl, iron-on HTV, cardstock, and sticker paper. It can also draw, foil, and more, expanding your creative possibilities.

5. Maintenance

- **Cleaning:** Regularly clean your machine with a soft, dry cloth. Ensure no debris is obstructing the cutting path or rollers.
- **Blade Care:** Inspect your Fine-Point Blade for wear or damage. Replace the blade when cuts become less precise or ragged.
- **Mat Care:** Keep your cutting mats clean and covered when not in use to maintain their stickiness. Gently clean mats with warm water and mild soap if they lose tackiness.
- **Software Updates:** Periodically check for updates to the Cricut Design Space app to ensure optimal performance and access to new features.

6. Troubleshooting

- **Connection Issues:** If your machine is not connecting, ensure Bluetooth is enabled on your device and the machine is powered on. Try restarting both the machine and the Design Space app.
- **Cutting Problems:** If cuts are not clean, check your blade for damage or dullness. Ensure your material is properly adhered to the cutting mat and that the correct material setting is selected in Design Space.
- **Print-Then-Cut Errors:** For issues with Print-Then-Cut, ensure your printer is calibrated and that the print area in Design Space matches your material size. Check for adequate lighting for the machine to read registration marks.
- **Material Jams:** If material jams, power off the machine, carefully remove the material, and inspect for any obstructions.
