Designed for optimal comfort and support, this memory foam mattress features a breathable cooling cover, contouring memory foam, and dynamic support foam to enhance your sleep experience.

Setup

Your Nectar mattress is conveniently delivered in a box, compressed and rolled for easy transport. Follow these steps for proper setup:

1. **Placement:** Move the boxed mattress to the room where it will be used.
2. **Unbox:** Carefully open the outer carton.
3. **Unroll:** Remove the rolled mattress from the box and place it on your bed frame or foundation.
4. **Expand:** Carefully cut and remove the plastic packaging. The mattress will begin to expand immediately. Allow 24 to 72 hours for the mattress to fully decompress and reach its intended shape and firmness.

Maintenance

Proper care and maintenance will extend the life of your Nectar mattress.

- **Cover Care:** The mattress features a washable cover. Refer to the care tag on the mattress for specific washing instructions.
- **Spot Cleaning:** For minor spills, gently spot clean with a mild detergent and water. Avoid saturating the mattress.
- **Protection:** Using a mattress protector is recommended to safeguard against spills, stains, and allergens.
- **Rotation:** Rotate your mattress 180 degrees every 3-6 months to promote even wear and prolong its lifespan. Do not flip the mattress.
- **Ventilation:** Ensure adequate airflow around the mattress to prevent moisture buildup.

Troubleshooting

If you encounter any issues with your Nectar mattress, consider the following common solutions:

- **Incomplete Expansion:** If the mattress has not fully expanded after 72 hours, ensure it is on a flat surface and has sufficient airflow. Cooler temperatures can sometimes slow down the expansion process.
- **Initial Odor:** A new mattress may have a slight "new mattress" odor upon unboxing. This is normal and will dissipate within a few days in a well-ventilated room.
- **Firmness Perception:** Mattress firmness is subjective. Allow several weeks for your body to adjust to the new mattress. If it feels too firm, a mattress topper can be added for additional plushness.
- **Back Pain:** While designed for pressure relief, initial adjustment to a new mattress can sometimes cause temporary discomfort. Ensure proper pillow support and allow time for your body to adapt.
