OPERATING INSTRUCTIONS

Temperature Control

The refrigerator features simple and reliable mechanical controls to set and maintain the internal temperature. The temperature dial is located inside the unit, typically near the LED lighting. Adjust the dial to your desired setting between 32°F and 50°F (0°C and 10°C). A lower number on the dial indicates a warmer temperature, while a higher number indicates a colder temperature. Allow several hours for the temperature to stabilize after adjustment.

LED Lighting

The refrigerator is equipped with bright, energy-efficient LED lights located at the top to enhance product visibility. These lights can be controlled by a separate ON/OFF switch, allowing you to turn them off overnight to conserve energy if desired.
