Naturehike KOTA 6

Naturehike KOTA 6 Person Camping Tent Instruction Manual

Model: KOTA 6

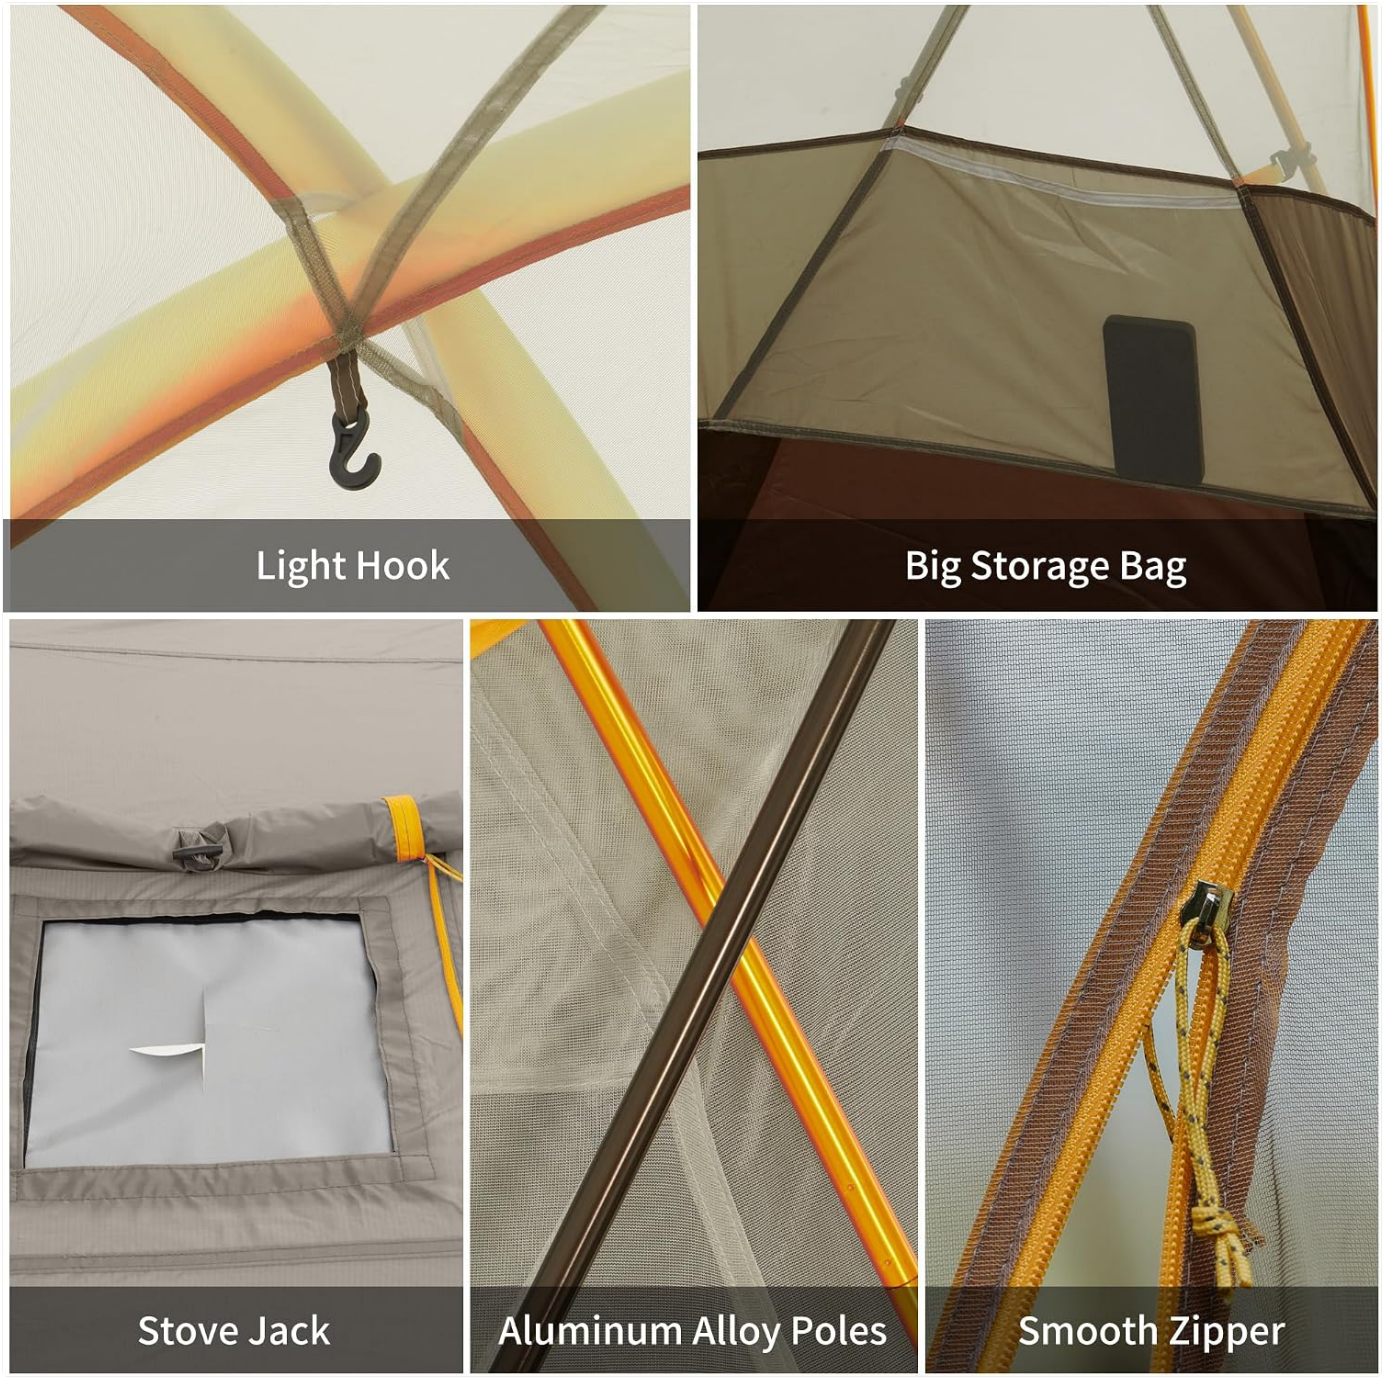

Introduction

This manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your Naturehike KOTA 6 Person Camping Tent. Please read this guide thoroughly before your first use to ensure proper assembly and to maximize your camping experience. Retain this manual for future reference.

Included Components

Your Naturehike KOTA 6 Person Camping Tent package includes the following items:

- Carry bag x 1
- Outer Tent x 1
- Inner Tent x 1
- Tent poles x 4 (aluminum alloy)
- Poles storage bag x 1
- Pegs x 21
- Wind ropes x 8
- Strapping x 1
- Positioning webbing x 2

Detailed view of key tent features: light hook, large storage bag, stove jack, aluminum alloy poles, and smooth zipper.

Setup Instructions

Follow these steps to properly assemble your Naturehike KOTA 6 Person Camping Tent. Assembly typically takes approximately 5 minutes with two people.

1. **Prepare the Area:** Lay out the carry bag and remove all components. Choose a flat, clear area for your tent.
2. **Assemble Inner Tent Poles:** Assemble the aluminum alloy poles. Insert the poles into the sleeves of the inner tent.

Step 1: Insert the aluminum alloy poles into the designated sleeves of the inner tent.

2. **Set Up Inner Tent:** Attach the poles to the inner tent using the clip attachment mechanism, ensuring the inner tent is free-standing.

Step 2: Erect the inner tent by securing the poles, making it free-standing.

3. **Position Outer Tent:** Secure the outer tent over the inner tent, aligning the doors and windows. Insert the pole for the porch sleeve. A slight force may be needed due to friction with the inner tent sleeves.

Step 3: Drape the outer tent over the inner tent, ensuring proper alignment.

4. **Secure the Tent:** Use the pegs to stake down the tent at all designated anchor points. Attach the wind ropes to the tent for additional stability, especially in windy conditions. Adjust the strapping and positioning webbing as needed for a secure setup.

Step 4: The tent is fully set up and secured with pegs and wind ropes.

Operating Your Tent

4-Season Versatility

The Naturehike KOTA 6 is a double-layer tent designed for 4-season use. The inner tent and outer tent (shelter) can be used together or separately. In warm seasons, the mesh inner tent can be used independently for stargazing and maximum airflow. The outer tent can be used alone as a large canopy, sun shelter, or rain shelter.

The tent offers versatile configurations, allowing the inner tent to be used independently, the outer tent as a large canopy, or both combined for a room and porch setup.

Ventilation

The tent features 2 large mesh windows and 2 air vents to ensure excellent air circulation, which helps to reduce condensation. Two large doors provide easy access and contribute to great ventilation in warmer conditions.

The tent's design promotes excellent airflow with two large mesh doors and strategically placed air vents.

Stove Jack Feature

The Naturehike KOTA 6 is equipped with a stove jack, allowing for the safe use of a camping stove within the large vestibule area. This feature enables you to stay warm in cold weather while sleeping comfortably in the inner tent. Ensure proper ventilation when using a stove and follow all safety guidelines for your specific stove model.

The tent features a stove jack in the vestibule, allowing for the use of a camping stove to provide warmth.

Maintenance

Proper care and maintenance will extend the lifespan of your tent.

- **Cleaning:** The tent fabric should be hand washed only. Use mild soap and cold water. Do not use harsh detergents, bleach, or machine wash, as this can damage the waterproof coating and fabric.
- **Drying:** Always ensure the tent is completely dry before packing it away. Packing a damp tent can lead to mildew growth and damage to the waterproof coating. Air dry in a shaded area, away from direct sunlight.
- **Storage:** Store your tent in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Pole Care:** Inspect tent poles for any damage or bending after each use. Clean poles if they become dirty.
- **Zipper Care:** Keep zippers clean and free of dirt and debris. Lubricate with a zipper lubricant if they become stiff.

Troubleshooting

Condensation

Condensation can occur inside tents due to temperature differences and humidity. To minimize condensation, ensure adequate ventilation by keeping the mesh windows and air vents open whenever possible. Proper site selection (avoiding damp areas) also helps.

Water Leakage

While the tent is designed to be waterproof (PU 3000mm+), ensure all seams are properly sealed and the rainfly is taut and correctly positioned. In heavy rain, water can sometimes pool on the rainfly if not properly tensioned, or seep through unprotected areas like window sills if not designed to be fully covered. Always ensure all guy lines are staked out and tensioned to prevent water pooling and maintain structural integrity.

This video demonstrates the weatherproof capabilities of the Naturehike KOTA 6 Person Camping Tent under simulated rain and wind conditions.

Pole Damage

In extreme weather conditions, tent poles can be subjected to significant stress. Always ensure your tent is properly guyed out and staked down to distribute wind loads. If a pole is damaged, contact customer support for replacement parts.

Specifications

Dimensions and weight of the Naturehike KOTA 6 Person Camping Tent.

Feature	Detail
Model Name	KOTA 6
Occupancy	6 Person
Seasons	4 Season
Product Dimensions (L x W x H)	212"L x 99.2"W x 80.7"H (540 x 252 x 205 cm)
