3.5 Steering Wheel Control (SWC)

The unit supports original steering wheel controls, allowing for safe operation without needing an additional remote controller. This enables control over volume, track changes, and call management directly from your steering wheel. Refer to the 'Mirror Link and Steering Wheel Control' image in section 3.2 for a visual representation of SWC functionality.

3.6 Equalizer (EQ)

Customize your audio experience with the built-in equalizer, offering various sound effects and adjustments to suit your preferences.

Refer to the 'FM/RDS Radio, Bluetooth, EQ, and Reverse Function' image in section 3.4 for a visual representation of the EQ interface.

3.7 Reverse Function

The unit supports a reversing camera input, providing a clear view of the area behind your vehicle when reversing, enhancing safety.

Refer to the 'FM/RDS Radio, Bluetooth, EQ, and Reverse Function' image in section 3.4 for a visual representation of the reverse camera display.

4. MAINTENANCE

To ensure the longevity and optimal performance of your SIXWIN Autoradio, follow these general maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents that may damage the screen.
- **Temperature:** Avoid exposing the device to extreme temperatures, both hot and cold, as this can affect its electronic components.
- **Connections:** Periodically check all cable connections to ensure they are secure and free from damage.
- **Software Updates:** Check the manufacturer's website or contact support for available software updates to improve performance and add new features.

5. TROUBLESHOOTING

If you encounter issues with your SIXWIN Autoradio, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
Device does not power on	Check power cable connections. Ensure vehicle ignition is on. Verify fuse.
No sound	Check speaker wiring. Ensure volume is not muted or set to zero. Verify audio output settings.
CarPlay/Android Auto not connecting	Ensure Bluetooth/WiFi is enabled on your phone and the head unit. Use original USB cable for wired connections. Restart both phone and head unit.
Steering Wheel Controls not working	Verify CANbus decoder connection and configuration. Ensure the steering wheel control wires are correctly connected to the head unit. Some vehicles may require specific programming.
GPS signal weak or inaccurate	Ensure GPS antenna is properly installed and has a clear view of the sky. Check antenna connection.
Touchscreen unresponsive	Restart the device. If the problem persists, contact customer support.

If the issue is not resolved by the above steps, please contact customer support for further assistance.
